## **Some Perceptual Prerequisites For Reading Ira Series On The Development Of The Reading Process:**

Some Perceptual Prerequisites for Reading Uta Frith, Juliet M. Vogel, 1980      **Reading and Understanding** Joseph H. Danks, Kathy Pezdek, 1980 This monograph the sixth in a series on the development of the reading process is concerned with the development of reading comprehension In the first chapter Comprehension in Listening and Reading Same or Different Joseph H Danks analyzes the evidence for the proposition that the comprehension processes for language in print and language in speech are the same and for the contrary proposition that there are significant differences in the understanding of the message in print and speech In the second chapter Arguments for a Constructive Approach to Comprehension and Memory Kathy Pezdek reviews pertinent research literature on comprehension from the constructive memory approach to the issue She makes a case for the proposition that the meaning of a sentence is not simply the sum of the separate meanings of the individual words and that sentence comprehension is in a very real sense the determiner of the words of the sentence She also reviews factors of constructive memory that influence reading comprehension MKM      *Language Awareness and Reading* Lynn H. Downing, R. Valtin, 2012-12-06 During the 1970s there was a rapid increase in interest in metacognition and metalinguistics The impetus came from linguistics psychology and psycho linguistics But with rather unusual rapidity the work from these scientific disciplines was taken over in education This new direction in these various areas of academic study was taken simultaneously by several different investigators Although they had varying emphases their work sometimes appears to be overlapping despite this it has been rather difficult to find a consensus This is reflected in the varying terminology used by these independent investigators linguistic awareness metacognition metalinguistic ability task awareness lexical awareness and so on For educators these developments presented a glittering array of new ideas that promised to throw light on children's thinking processes in learning how to read Many reading researchers and graduate

students have perceived this as a new frontier for the development of theory and research. However, the variety of independent theoretical approaches and their accompanying terminologies has been somewhat confusing.
