Some Things Words Can Do:

, *Using Words and Things* Mark Coeckelbergh, 2017-06-26 This book offers a systematic framework for thinking about the relationship between language and technology and an argument for interweaving thinking about technology with thinking about language The main claim of philosophy of technology that technologies are not mere tools and artefacts not mere things but crucially and significantly shape what we perceive do and are is re thought in a way that accounts for the role of language in human technological experiences and practices Engaging with work by Wittgenstein Heidegger McLuhan Searle Ihde Latour Ricoeur and many others the author critically responds to and constructs a synthesis of three extreme idealtype untenable positions 1 only humans speak and neither language nor technologies speak 2 only language speaks and neither humans nor technologies speak and 3 only technology speaks and neither humans nor language speak The construction of this synthesis goes hand in hand with a narrative about subjects and objects that become entangled and constitute one another Using Words and Things thus draws in central discussions from other subdisciplines in philosophy such as philosophy of language epistemology and metaphysics to offer an original theory of the relationship between language and philosophy of technology centered on use performance and narrative and taking a transcendental turn
