Some Branch Against The Sky:

Some Branch Against the Sky G. F. Dutton, 1997 More importantly *Some Branch against the Sky* sets us thinking about what a garden is and how it differs from its surroundings about cultivation and wilderness and how we can tread the border between the two about climate and situation and how we can learn the most from those that appear the least favourable if we work with rather than against them And it suggests how gardeners or not we can help reduce the loss of our near wild habitat by integrating with our own chosen part of it *Some Branch Against the Sky* Geoffrey John Fraser Dutton, 1997

The Amateur Photographer and Photographic News Charles W. Hastings, Thomas Cradock Hepworth, A. Horsley Hinton, 1908 Overgrown Julian Raxworthy, 2023-08-01 A call for landscape architects to leave the office and return to the garden Addressing one of the most repressed subjects in landscape architecture this book could only have been written by someone who is both an experienced gardener and a landscape architect With *Overgrown* Julian Raxworthy offers a watershed work in the tradition of Ian McHarg Anne Whiston Spirn Kevin Lynch and J B Jackson As a discipline landscape architecture has distanced itself from gardening and landscape architects take pains to distinguish themselves from gardeners or landscapers Landscape architects tend to imagine gardens from the office representing plants with drawings or other simulations whereas gardeners work in the dirt in real time planting pruning and maintaining In *Overgrown* Raxworthy calls for the integration of landscape architecture and gardening Each has something to offer the other Landscape architecture can design beautiful spaces and gardening can enhance and deepen the beauty of garden environments over time Growth says Raxworthy is the medium of garden development landscape architects should leave the office and go into the garden in order to know growth in an organic nonsimulated way Raxworthy proposes a new practice for working with plant material that he terms the viridic after the tectonic in architecture from the Latin word for green with its associations of spring and growth He builds his argument for the viridic through six generously illustrated case studies of gardens that range from formal to informal approaches from a sixteenth century French Renaissance water garden to a Scottish poet scientist's marginal garden barely differentiated from nature Raxworthy argues that landscape architectural practice itself needs to be gardened brought back into the field He offers a Manifesto for the Viridic that casts designers and plants as vegetal partners in a renewed practice of landscape gardening **How to Draw Trees** Frank M. Miss MacIntosh, My Darling Marguerite Young,2024-04-09 This novel is one of the most ambitious and remarkable literary achievements of our time It is a picaresque psychological novel a novel of the road a journey or voyage of the human spirit in its search for reality in a world of illusion and nightmare It is an epic of what might be called the Arabian Nights of American life Marguerite Young's method is poetic imagistic incantatory in prose of extraordinary richness she tests the nature of her characters and the nature of reality *Miss MacIntosh My Darling* is written with oceanic music moving at many levels of consciousness and perception but the toughly fibred realistic fabric is always there in the happenings of the narrative the
