Alchemical Belief Bruce Janacek, 2012-06-19 What did it mean to believe in alchemy in early modern England In this book Bruce Janacek considers alchemical beliefs in the context of the writings of Thomas Tymme Robert Fludd Francis Bacon Sir Kenelm Digby and Elias Ashmole Rather than examine alchemy from a scientific or medical perspective Janacek presents it as integrated into the broader political philosophical and religious upheavals of the first half of the seventeenth century arguing that the interest of these elite figures in alchemy was part of an understanding that supported their national and in some cases royalist loyalty and theological orthodoxy Janacek investigates how and why individuals who supported or were actually placed at the traditional center of power in England's church and state believed in the relevance of alchemy at a time when their society their government their careers and in some cases their very lives were at stake

Fictions of Conversion Jeffrey S. Shoulson, 2013-03-21 Fictions of Conversion investigates the anxieties produced by the rapid and erratic religious political and cultural transformations in early modern England which were often given shape in poetry plays and translations by the figure of the Jewish converso

Rhetoric and the Early Royal Society Tina Skouen,Ryan Stark,2014-11-27 The Royal Society s establishment in 1660 signaled a new beginning for the rhetoric of science mainly because the organization s founders advocated a modern plain style for scientific communication Rhetoric and the Early Royal Society aims to initiate fresh debates about this watershed event in the history of rhetoric and science In the last twenty years scholars in numerous disciplines have produced significant work ranging from theoretical essays to case studies of founding members such as Wilkins Hooke and Boyle This is the first book to collect in one volume the key contributions The newly written introduction by editors Skouen and Stark places the reprinted essays into perspective by evaluating the Society s pioneering role in shaping modern scholarly communication *Literatures of Alchemy in Medieval and Early Modern England* Eoin Bentick,2022 Explores the myriad ways in which alchemy was conceptualised by adepts and sceptics alike from those with recourse to a fully functioning laboratory to those who did not know their pelican from their athanor The language of alchemy the art of transmuting metals and manufacturing pharmaceutical medicine is defined by obscure imagery authorial play and dense knottiness tempting

curious readers to unpick its impenetrable promises From the fourteenth to the seventeenth century alchemical literature was read interpreted and reimagined both by those with recourse to a fully functioning laboratory and those who did not know their pelican from their athanor Recent studies by historians of science have succeeded in decoding the difficult language of these texts revealing the replicable chemical procedures behind their metaphors However as a literary investigation of alchemy this book explores more fluid understandings of the art in the period Through an analysis of medieval and early modern texts and manuscript cultures the volume explores the myriad ways in which alchemy was conceptualised in this period by adept and sceptic alike From Geoffrey Chaucer s mockery of the impotence of alchemical pryvetee in *The Canterbury Tales* and John Gower s macrocosmic hope for societal amelioration in the *Confessio Amantis* to Elias Ashmole s angelic alchemy in the *Theatrum chemicum britannicum* it explores the natural philosophy that underpinned such diverse representations of this sliding science proffering a theory of alchemical hermeneutics as a conspiratorial way of reading that sees alchemy in all

The Alchemist in Literature Theodore Ziolkowski, 2015 Unlike most other studies of alchemy and literature which focus on alchemical imagery in poetry of specific periods or writers this book traces the figure of the alchemist in Western literature from its first appearance in the Eighth Circle of Dante s *Inferno* down to the present From the beginning alchemy has had two aspects exoteric or operative the transmutation of baser metals into gold and esoteric or speculative the spiritual transformation of the alchemist himself From Dante to Ben Jonson during the centuries when the belief in exoteric alchemy was still strong and exploited by many charlatans to deceive the gullible writers in major works of many literatures treated alchemists with ridicule in an effort to expose their tricks From the Renaissance to the Enlightenment as that belief weakened the figure of the alchemist disappeared even though Protestant poets in England and Germany were still fond of alchemical images But when eighteenth century science almost wholly undermined alchemy the figure of the alchemist began to emerge again in

literature now as a humanitarian hero or as a spirit striving for sublimation Following these esoteric romanticizations as scholarly interest in alchemy intensified writers were attracted to the figure of the alchemist and his quest for power The fin de siècle saw a further transformation as poets saw in the alchemist a symbol for the poet per se and others influenced by the prevailing spiritism as a manifestation of the religious spirit During the interwar years as writers sought surrogates for the widespread loss of religious faith esoteric alchemy underwent a pronounced revival and many writers turned to the figure of the alchemist as a spiritual model or in the case of Paracelsus in Germany as a national figurehead This tendency theorized by C G Jung in several major studies inspired after World War II a vast popularization of the figure in novels historical set in the present or juxtaposing past and present in England France Germany Italy Brazil and the United States The inevitable result of this popularization was the trivialization of the figure in advertisements for healing and cooking or in articles about scientists and economists In sum the figure of the alchemist in literature provides a seismograph for major shifts in intellectual and cultural history
