**The War on Hospital Ships, 1914-1918** Stephen McGreal,2009-04-20 It is often said The first casualty of war is the truth and there is no better example of this than the furore caused by the claims and counterclaims of the British and German Governments at the height of the First World War Wounded allied personnel were invariably repatriated by hospital ships which ran the gauntlet of mined waters and gambled on the humanity of the U Boat commanders For contrary to the terms of the Geneva Convention on occasions Germany had sunk the unarmed hospital ships under the pretense they carried reinforcement troops and ammunition The press seized on these examples of Hun Barbarity especially the drowning of noncombatant female nurses The crisis heightened following the German Governments 1 February 1917 introduction of unrestricted naval warfare The white painted allied hospital ships emblazoned with huge red crosses now became in German eyes legitimate targets for the U Boats As the war on the almost 100 strong fleet of hospital ships intensified the British threatened reprisals against Germany in particular an Anglo French bombing raid upon a German town Undeterred the Germans stepped up their campaign sinking two hospital ships in swift succession Seven hospital ships struck mines and a further eight were torpedoed Faced with such a massacre of the innocents Britain decided her hospital ships painted and brightly lit in accordance with the Geneva Convention could no longer rely on this immunity The vessels were repainted in drab colors defensively armed and sailed as ambulance transports among protected convoys Germany had successfully banished hospital ships from the high seas

Structures or Why things don't fall down J. Gordon,2012-12-06 I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures Indeed it is only when the subject is stripped of its mathematics that

one begins to realize how difficult it is to pin down and describe those structural concepts which are often called elementary by which I suppose we mean basic or fundamental Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject Although this volume is more or less a sequel to *The New Science of Strong Materials* it can be read as an entirely separate book in its own right For this reason a certain amount of repetition has been unavoidable in the earlier chapters I have to thank a great many people for factual information suggestions and for stimulating and sometimes heated discussions Among the living my colleagues at Reading University have been generous with help notably Professor W D Biggs Professor of Building Technology Dr Richard Chaplin Dr Giorgio Jeronimidis Dr Julian Vincent and Dr Henry Blyth Professor Anthony Flew Professor of Philosophy made useful suggestions about the last chapter I am also grateful to Mr John Bartlett Consultant Neurosurgeon at the Brook Hospital Professor T P Hughes of the University of the West Indies has been helpful about rockets and many other things besides My secretary Mrs Jean Collins was a great help in times of trouble Mrs Nethercot of Vogue was kind to me about dressmaking Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness Among the dead I owe a great deal to Dr Mark Pryor lately of Trinity College Cambridge especially for discussions about biomechanics which extended over a period of nearly thirty years Lastly for reasons which must surely be obvious I owe a humble oblation to Herodotus once a citizen of Halicarnassus

*With Malice Aforethought* Louis Blom-Cooper,Terence Morris,2004-10-19 For more than three centuries the criminal law has given rise to a divergent set of approaches to the crime of homicide Whereas the law of murder has not conceptually changed the crime of manslaughter has resulted in some forms of homicide being visited with relatively minor penalties These various categories of unlawful killing present considerable problems relating to intention or lack of it and the culpability of those whose behaviour while lacking in evident malice is characterised by the grossest recklessness The reaction of the relatives of victims is generally simpler They frequently find it impossible to understand how those who kill by dangerous or drunken driving may receive comparatively lenient sentences while those convicted of manslaughter following a drunken brawl may be dealt with more severely and yet others convicted of so called mercy killings are subject to the mandatory penalty of life imprisonment This book addresses the powerful and controversial arguments for the current distinctions between murder manslaughter and other specific categories of crime to be abolished and subsumed within a single crime of culpable homicide In the course of this analysis the authors consider a number of issues of great contemporary importance including the presentation of expert evidence in cases involving unexplained infant death corporate killing and the question of the defences available to the accused including self defence and provocation where popular notions of what is reasonable or justifiable may be at variance with legal precedent While this book aims to consider criminal homicide in its social historical and legal setting it also goes far beyond in setting out the case for radical reform
