Someone Else's War:

Someone Else's War John Connor, 2019-08-22 World War I was the first truly global conflict and its effects were felt across the British Empire. When war broke out in 1914, Great Britain had the largest empire encompassing one quarter of the population of the world. Many colonial citizens were to be enlisted into the war effort and shipped from their homes in Africa, Asia, and Australasia to fight on the battlefields of the Western Front. What was the experience of war like for citizens of the empire, whether combatants or not? How did the empire affect countries administered by Great Britain but geographically located tens of thousands of miles from the conflict? In this book, John Connor tells the story of the people whose lives were profoundly affected by someone else's war, dragged against their will into a geopolitical conflict vastly removed from their normal lives.

Mercenaries in Asymmetric Conflicts Scott Fitzsimmons, 2013 Fitzsimmons argues that small mercenary groups must maintain a superior culture to successfully engage and defeat larger and better equipped opponents.

Quebec's Eastern Townships and the World Cheryl Gosselin, Andrew C. Holman, Christopher Kirkey, 2025-03-04 The Eastern Townships of Quebec are celebrated in popular discourse as a charming and remote nature playground for busy Montrealers, an appendage to stately Quebec City, and a northern abutment to the Northeast Kingdom of the United States. A closer look reveals a region with its own gravity, sense of being, and worldly connections. Quebec's Eastern Townships and the World examines the region's direct links to larger prevailing international forces and identities. Here the Eastern Townships take centre stage as the reader encounters the vibrancy of a place marked not by its insularity but by its long history, a central meeting ground shaped by its many engagements with the world. The book provides new perspectives on compelling and significant topics in Townships history and culture, including Indigenous land use, the mobility of peoples to and from the region, linguistic diversity, economic production, education, sport, religion, and culture in myriad forms. These studies recast the Eastern Townships as a centre, a borderland, a lieu de passage between nations, communities, and peoples. Featuring original and compelling insights, Quebec's Eastern Townships and the World confirms that this beautiful region was and is a global place, one intimately connected to the world.

Experiencing War Christine Sylvester, 2010-11-23 This edited collection explores aspects of contemporary war that affect average people physically, emotionally, and ethically through activities ranging from combat to television viewing. The aim of this work is to supplement the usual emphasis on strategic and national issues of war in the interest of theorizing aspects of war from the point of view of individual experience: be the individual, a combatant, a casualty, a supporter, opponent, recorder, veteran, distant viewer, an international lawyer, an ethicist, or other intellectual. This volume presents essays that push the boundaries of war studies and war thinking without promoting one kind of theory or methodology for studying war as experiential politics but with an eye to

exploring the possibilities and encouraging others to take up the new agenda It includes new and challenging thinking on humanitarianism and war new wars in the Third World gender and war thinking and the sense of the body within war that inspires recent UN resolutions It also gives examples that can change our understanding of who is located where doing what with respect to war women warriors in Sierra Leone war survivors living with their memories and even an artist drawing something seemingly intangible about war the arms trade The unique aspect of this book is its purposive pulling together of foci and theoretical and methodological perspectives from a number of disciplines on a variety of contemporary wars Arguably war is an activity that engages the attention the politics and the lives of many people To theorize it with those lives and perspectives in mind recognizing the political contexts of war is long overdue This inter disciplinary book will be of much interest to students of war studies critical security studies gender studies sociology and IR in general

Warfare Since the Second World War Torsten Schwinghammer, 2018-04-24 Warfare Since the Second World War presents a wealth of analysis and data about one of the most pressing questions of our time why does war continue to plague us fifty years after World War II This book argues that the nature of war has shifted from inter state conflicts toward internal conflicts above all civil war Low intensity conflict helps explain the constant increase in wars over the last fifty years and makes it probable this trend will continue Gantzel and Schwinghammer argue that modern warfare reflects a continuation of the nation state building process begun in nineteenth century Europe In their analysis economic modernization and social integration destroy traditional relations and create instability in the developing world While these forces were successfully harnessed by the modern state in Europe and North America economic and political globalization make a similar resolution considerably more complex In addition to their insightful analysis the authors provide a detailed list of all wars fought from 1945 to 1995 The authors lucid explanatory commentaries are accompanied by lists tables and charts In addition to a detailed war register upon which all statistical data and analyses for the volume are based there are appendices with directories useful for locating specific wars as well as several supplementary lists An afterword brings the reader closer to the world situation as we conclude the twentieth century including the impact of political developments in Eastern Europe Beyond its historical dimension this book offers a policy relevant empirical demonstration of the ongoing increase in internal civil wars and addresses the inability of modern society to prevent this scourge Warfare Since the Second World War is an indispensable resource for anyone concerned with issues of war and peace development and the future of international relations

The Regionalization of Warfare James Brown, 2023-03-31 Three wars have dominated world events in recent years The conflict which erupted between the United Kingdom and Argentina over the Falkland Malvinas Islands the multinational conflict in Lebanon involving Israeli Syrian and FLO forces in Lebanon and the savage struggles between ground and air units of the Iranian and Iraqi forces The scale and intensity of these wars their potential for global conflict make them crucial for an understanding among citizens in general and defense and political analysts in particular The authors and contributors to this

most unusual volume come to several common conclusions professionalism is a crucial factor in military effectiveness but not necessarily dependent on modes of recruitment high technology is crucial but only in relation to the quality and training of the personnel public support is necessary to sustain military morale in democratic and authoritarian regimes alike These are only some of the incisive findings registered and explored in *The Regionalization of Warfare* The volume assembles experts not only on these three major regional and interregional conflicts but on current U S defense policies Soviet strategic interests in Middle East and Persian Gulf conflicts and a series of papers on lessons learned and unlearned as a result of these small wars of the early 1980s For those interested in military history global strategy and regional rivalries this collection of finely written sophisticated papers will prove to be of intense concern
