

The background of the cover is a photograph of a rural landscape at sunset. A small, single-story house with a dark roof is in the middle ground. The sky is filled with warm, orange and yellow clouds. The entire image is overlaid with a network of thin, dark, cracked lines, resembling shattered glass.

## Someplace Like Home:

Someplace Like Home Bobi Conn, 2024-05-21      Home Alison Blunt, Robyn Dowling, 2022-05-30 Home articulates a critical geography of home in which home is understood as an emotive place and spatial imaginary that encompasses lived experiences of everyday domestic life alongside a wider and often contested sense of being and belonging in the world. Engaging with the burgeoning cross disciplinary interest in home since the first edition was published this significantly revised and updated second edition contains new research boxes illustrations and contemporary examples throughout. It also adds a new chapter on Home and the City that extends the scalar understanding of home to the urban. The book develops the conceptual and methodological underpinnings of a critical geography of home drawing on key feminist postcolonial and housing thinkers as well as contemporary methodological currents in non representational thinking and performance. The book's chapters consider the making and unmaking of home across the domestic scale house as home the urban city as home national nation as home and homemaking in relation to transnational migration and diaspora. Each chapter includes illustrative examples from diverse geographical contexts and historical time periods. Chapters also address some of the key cross cutting dimensions of home across these scales including digital connectivity art and performance more than human constructions of home and violence and dispossession. The book ends with a research agenda for home in a world of COVID 19. The book provides an understanding of home that has three intersecting dimensions that material and imaginative geographies of home are closely intertwined that home power and identity are intimately linked and that geographies of home are multi scalar. This framework the examples used to illustrate it and the intended audience of academics and students across the humanities and social sciences will together shape the field of home studies into the future.      *Oceanography and Marine Biology* R.N. Hughes, D.J. Hughes, I. P. Smith, A.C. Dale, 2015-08-26 Ever increasing interest in oceanography and marine biology and their relevance to global environmental issues create a demand for authoritative reviews summarizing the results of recent research. *Oceanography and Marine Biology An Annual Review* has catered to this demand since its founding by the late Harold Barnes more than 50 years ago. Its obj      **Behavioural Responses to a Changing World** Bob B. M. Wong, Ulrika Candolin, 2025-04-23 For many animals behavioural adjustments represent the first response to human modified conditions. By improving reproduction and survival such adjustments can play the lead in maintaining viable populations in the face of rapid environmental change. Behavioural responses however can also be maladaptive and reduce individual fitness particularly if favourable reaction norms have not yet evolved because animals are encountering conditions that they have never experienced before. Clearly behaviour matters. But how can we capitalise on our understanding of animal behaviour to improve conservation and management outcomes. *Behavioural Responses to a Changing World Challenges and Applications* a companion volume to the first edition published in 2012 examines wildlife behavioural responses to human induced environmental change through a translational lens. Despite considerable and growing interest in research on the

topic the predictive value and practical application of what has been learned remains underappreciated and underutilized in the context of developing real world solutions To redress this the current book builds upon the foundations of the original volume but with a more applied perspective that focuses on highlighting how different forms of environmental challenges from climate change to urbanisation influence animal behaviour and how we can effectively harness knowledge of animal behaviour to effect practical solutions to predicting and mitigating the weighty impacts of a radically changed and changing world

**Reintroduction Biology** John G. Ewen, Doug P. Armstrong, Kevin A. Parker, Philip J. Seddon, 2012-01-30 This book aims to further advance the field of reintroduction biology beyond the considerable progress made since the formation of the IUCN SSC Re introduction Specialist Group Using an issue based framework that purposely avoids a structure based on case studies the book's central theme is advocating a strategic approach to reintroduction where all actions are guided by explicit theoretical frameworks based on clearly defined objectives Issues covered include husbandry and intensive management monitoring and genetic and health management Although taxonomically neutral there is a recognised dominance of bird and mammal studies that reflects the published research in this field The structure and content are designed for use by people wanting to bridge the research management gap such as conservation managers wanting to expand their thinking about reintroduction related decisions or researchers who seek to make useful applied contributions to reintroduction
