Something In The Wind Politics After Chernobyl:

Something in the Wind Louis Mackay, Mark Thompson, 1988 The Meanings of a Disaster Karena Kalmbach, 2020-12-07 The disaster at the Chernobyl nuclear power plant was an event of obviously transnational significance not only in the airborne particulates it deposited across the Northern hemisphere but in the political and social repercussions it set off well beyond the Soviet bloc Focusing on the cases of Great Britain and France this innovative study explores the discourses and narratives that arose in the wake of the incident among both state and nonstate actors It gives a thorough account of the stereotypes framings and othering strategies that shaped Western European nations responses to the disaster and of their efforts to come to terms with its long term consequences up to the present day Chernobyl (Routledge Revivals) Chris Park, 2013-09-05 First published in 1989 Chernobyl The Long Shadow offers a balanced review of what happened there why and how it happened and what the main lessons and implications of the accident are It looks back on events during and after the disaster in particular reviewing how it and the radiation fallout were dealt with in different countries and looks forward to how the incident might affect the nuclear power industry around the world The book explores the significance of the accident within the Soviet Union considers its impact on public confidence in nuclear power and reviews what improvements are necessary in emergency planning throughout the rest of the world It is written from an inter disciplinary perspective based on detailed scienctific research which is described in non specialist terms it considers themes like attitudes to nuclear power and political reaction to the accident itself It sets the Chernobyl accident into a proper context Chernobyl The Long Shadow will appeal to students and teachers of geography environmental science international politics nuclear physics and to anyone interested in current affairs and environmental problems The International Politics of Nuclear Waste Andrew Blowers, David Lowry, Barry D. Solomon, 1991-04-01 Looking at the politics of nuclear waste this book examines the subject from an international standpoint Other works by the author Andrew Blowers include The Limits of Power and Something in the Air and he has been co editor on books such as Nuclear Power in Crisis **Eco-nationalism** Jane I. Dawson, 1996 Examines the rise of the anti nuclear power movement in the former Soviet Union during the early perestroika period its unexpected successes in the late 1980s and its decline after 1991 This book argues that anti nuclear activism was a surrogate for nationalism and a means of demanding greater local self determination under the Soviet system

Politics Virginie Mamadouh,2017-05-15 Depending on the breadth or narrowness of the understanding of politics and the political politics in human geography is defined as either the operation of power in all social relations or the workings of power directed to or by the state This volume avoids the two extremes by acknowledging the transformation of approaches to the political in human geography over the past few decades but also by highlighting the continued importance of the more traditional state based conception of politics The selected articles are clustered around six themes new agendas in political geography state territoriality international relations and globalization internal territorial organisation and geographical scale

Smokestack Diplomacy Robert G.

Darst, 2001-01-02 Many environmental problems cross national boundaries and can be addressed only through international cooperation In this book Robert Darst examines transnational efforts to promote environmental protection in the USSR and in five of its successor states Russia Ukraine and the Baltic republics of Estonia Latvia and Lithuania from the late 1960s to the present The core of the book is a comparative study of three key issues nuclear power safety transboundary air pollution and Baltic Sea pollution Although expectations were high that the end of the Cold War and the breakup of the Soviet Union would lead to increased East West environmental cooperation the opposite has been true Russia and the other successor states have generally agreed to address such problems only when paid to do so Darst finds that post Cold War environmental cooperation has been most successful when there is an overlap between the environmental and economic interests of the successor states and those of their Western neighbors and when the foundation for cooperation was laid during the Cold War period The book is based on extensive original field research including interviews with diplomats government officials scientists and environmental activists in the successor states and Western Europe Its findings underscore the importance of the domestic and international political context in which international environmental policy making occurs It also deepens our understanding of the opportunities and dangers of positive inducements as a tool of international environmental policy

Nuclear Threats, Nuclear Fear and the Cold War of the 1980s Eckart Conze, Martin Klimke, Jeremy Varon, 2017 The book brings together cutting edge scholarship from the United States and Europe to address political and cultural responses to the arms race of the 1980s Security with Nuclear Weapons? Regina Cowen Karp, 1991 SIPRI Stockholm International Peace Research Institute is an independent institute for scientific research which aims to further an understanding of the conditions for peaceful solutions to international conflicts and for a stable peace Over the past twenty years SIPRI has concentrated on problems of armaments disarmament and arms regulation SIPRI is financed mainly by the Swedish Parliament Its staff the Governing Board and the Scientific Council are international The prospect of large reductions of nuclear weapons poses fundamental questions about the purpose of nuclear weapons Why have some states chosen to acquire nuclear weapons How and why have these decisions been maintained over time Why have some states elected to approach but not cross the nuclear threshold This book examines the commonalities and differences in political approaches to nuclear weapons both within and among three groups of states nuclear non nuclear and threshold The chapters explore the evolution of thinking about nuclear weapons and the role these weapons play in national security planning The book transcends traditional East West approaches to analysis of nuclear issues by giving equal prominence to the issues of nuclear proliferation and non nuclearism The book also provides a comprehensive analysis of how current approaches to nuclear weapons have evolved both within and among the countries under study Pragmatic Women and Body Politics Margaret Lock, Patricia Alice Kaufert, 1998-01-29 This thought provoking volume compares the responses of women in a variety of

countries and cultural settings to modern medical technologies The contributors describe how women in East Africa deal with infertility how American women respond to pre natal diagnostic screening how women in China and Japan choose to make use of reproductive technologies. The essays also explore wider themes such as the emergence of the breast cancer movement and how women confront environmental hazards which threaten them and their families It is often assumed that women are passive in the face of biomedical technology but this book shows that they make pragmatic choices with responses ranging from acceptance to rejection or indifference The reception of biomedical technology is situated in its local cultural contexts and vital issues of women s health are related to political and ethnic concerns **Troubled Pleasures** Kate Soper,1990-11-17 What happens when life s simple joys become complicated When pleasure is transformed as a function of consumption the innocent comforts of food nature and place are embedded in complex practices of distribution and exploitation Exotic and diverse objects of pleasure are made available only at the price of a heightened awareness of their origins genealogies and possible effects authenticity recedes behind objects produced as pleasures Troubled Pleasures considers the ways in which modern pleasure is fraught with unhappy implications at the same time as contemporary critical arguments put into question the touchstones of identity morality subjectivity and desire It brings together writings which explore the sources of pleasure s loss of innocence and which argue the case for a scrupulous alternative hedonism Including essays on human needs socialism and gender a feminist response to Joyce's Ulysses and a fictional reflection on appetite and excess Troubled Pleasures plots an Epicurean path between righteous asceticism and conspicuous consumption Theory and the Environment David Goldblatt, 2013-05-28 This book establishes whether contemporary social theory can help us understand the structural origins of environmental degradation and environmental politics Hank Johnston, John A. Noakes, 2005 Frames of Protest brings together important empirical research and theoretical essays by leading sociologists political scientists and media specialists that focus on social movement frames and framing practices Frames are new ways of understanding political and social relations that emphasize injustice and the need for change As such they are crucial for the development of social movements and protest Frames of Protest is the only book to focus exclusively on this major research perspective in social movement and protest studies Thirteen chapters encompass the major themes in the framing perspective to offer a state of the art review Three chapters present evidence for the determining influence of framing in social movement mobilization Next framing activities by the state and the mass media are analyzed Then two research reports examine the effect of political opportunities on framing in Poland under the Communists and in New York City's ethnic politics Several chapters by leading theorists present a lively debate about the relationship of ideologies to collective action frames The book closes with a hands on discussion about analyzing textual materials and interview transcripts to do frame analysis that lends itself to longitudinal and cross case comparisons Creating the Second Cold War Simon Dalby, 2016-10-06 The Cold War is over yet many attitudes and analyses typical of

the period persisted in the strategic thinking of the Great Powers In this brilliantly original study Simon Dalby uses the conceptual tools of geopolitical analysis to uncover the essence of American strategic discourse Focussing on the period of the late 1970s he shows how Washington pressure groups political organisations and in particular the Committee on the Present Danger recreated a language of confrontation that deeply influenced Western attitudes towards the Soviet Union in ways that continue to shape foreign policy Corruption and the Management of Public Safety Simon Ashley Bennett, 2024-03-05 Graft is a common and persistent social pathogen that afflicts the developed and developing world in equal measure This book describes through the medium of international case studies how graft undermines public safety and how following a near miss incident or accident investigators can use actor network theory ANT to ascertain to what degree and through what mechanisms graft contributed to the event The book introduces the reader to graft through a variety of case studies and explains how graft works against the public interest The relatable case studies include the 1989 Hillsborough football stadium disaster 2007 Adam Air crash 2015 ongoing Volkswagen diesel emissions scandal and 2020 Beirut ammonium nitrate explosion Lebanon It demonstrates the threat graft poses to public safety economic success and corporate and national reputation By the end of the book the reader will understand the nature and extent of the problem of graft how graft undermines safety confidence and reputation and how ANT can be used to identify and quantify graft in respect of the governance of technological systems and to ascertain to what degree and through what mechanisms graft contributed to a near miss incident or accident Primarily aimed at an academic audience this book will offer essential insights to students researchers and faculty within the fields of risk crisis and disaster management as well as corporate governance and safety The accessible nature of the book will also appeal to safety practitioners risk managers and accident investigators

Forging War Mark Thompson,1999 A fascinating study of the manipulation of the media in the former Yugoslavia The New York Times This study of the political manipulation of the media in Serbia Croatia Bosnia and Herzegovina before and during the war argues that political struggles for media control are early warnings of war and a form of preparation for it

Disaster Forensics Anthony J. Masys,2016-09-03 This book aims to uncover the root causes of natural and man made disasters by going beyond the typical reports and case studies conducted post disaster It opens the black box of disasters by presenting forensic analysis approaches to disasters thereby revealing the complex causality that characterizes them and explaining how and why hazards do or do not become disasters This yields systemic strategies for managing disasters Recently the global threat landscape has seen the emergence of high impact low probability events Events like Hurricane Katrina the Great Japan Earthquake and tsunami Hurricane Sandy Super Typhoon Haiyan global terrorist activities have become the new norm Extreme events challenge our understanding regarding the interdependencies and complexity of the disaster aetiology and are often referred to as Black Swans Between 2002 and 2011 there were 4130 disasters recorded that resulted from natural hazards around the world In these 1 117 527 people perished and a minimum of US 1 195 billion in

losses were reported In the year 2011 alone 302 disasters claimed 29 782 lives affected 206 million people and inflicted damages worth a minimum of estimated US 366 billion Sensemaking for Security Anthony J. Masys, 2021-05-31 This book presents sensemaking strategies to support security planning and design Threats to security are becoming complex and multifaceted and increasingly challenging traditional notions of security The security landscape is characterized as messes and wicked problems that proliferate in this age of complexity Designing security solutions in the face of interconnectedness volatility and uncertainty we run the risk of providing the right answer to the wrong problem thereby resulting in unintended consequences Sensemaking is the activity that enables us to turn the ongoing complexity of the world into a situation that is comprehended explicitly in words and that serves as a springboard into action Weick Sutcliffe Obstfeld 2005 It is about creating an emerging picture of our world through data collection analysis action and reflection The importance of sensemaking to security is that it enables us to plan design and act when the world as we knew it seems to have shifted Leveraging the relevant theoretical grounding and thought leadership in sensemaking key examples are provided thereby illustrating how sensemaking strategies can support security planning and design This is a critical analytical and leadership requirement in this age of volatility uncertainty complexity and ambiguity that characterizes the security landscape This book is useful for academics graduate students in global security and government and security planning practitioners The New Political Geography of Eastern Europe John O'Loughlin, Herman van der Wusten, 1993-03-16 Compiled by two world renowned authorities on geopolitics it explores the geographical dimension of the Warsaw Pact breakup and the emerging Central European democracies Covers the social and political transformation of these areas looks at pioneering work on the electoral geography discusses sociopolitical uncertainties in an international context and delves into the pressures of nationalism economic and social chaos as well as inexperience on both the regional and geopolitical system The Palarave Handbook of Environmental Labour Studies Nora Räthzel, Dimitris Stevis, David Uzzell, 2021-08-30 In this comprehensive Handbook scholars from across the globe explore the relationships between workers and nature in the context of the environmental crises They provide an invaluable overview of a fast growing research field that bridges the social and natural sciences Chapters provide detailed perspectives of environmental labour studies environmental struggles of workers indigenous peoples farmers and commoners in the Global South and North The relations within and between organisations that hinder or promote environmental strategies are analysed including the relations between workers and environmental organisations NGOs feminist and community movements
