

"My reading of Madeleine Doran's essays was throughout an enriching experience. Whether, in the midst of her consideration of birds and mountains and fog, she turns to Shakespeare or to Chaucer or to the *Book of Job*, it is with the same understanding that these different matters are all a part of a rich and informed life, and not without interconnections."

Ecological Challenges and Conservation Conundrums John A. Wiens, 2025-02-25 Short compelling but mostly thought provoking essays that encompass many of the central issues shaping ecology and conservation in the changing world Collected essays from one of the best known ecologists and conservationists in the world Includes all issues at the cutting edge of the interface between ecology and conservation Attractive to a broad audience of ecologists conservationists natural resource managers policy makers and naturalists **Thought and Language: an essay, having in view the revival, correction, and exclusive establishment of Locke's Philosophy** Benjamin Humphrey Smart, 1855 **The Blank Swan** Elie Ayache, 2010-05-05 October 19th 1987 was a day of huge change for the global finance industry On this day the stock market crashed the Nobel Prize winning Black Scholes formula failed and volatility smiles were born and on this day Elie Ayache

began his career on the trading floor of the French Futures and Options Exchange Experts everywhere sought to find a model for this event and ways to simulate it in order to avoid a recurrence in the future but the one thing that struck Elie that day was the belief that what actually happened on 19th October 1987 is simply non reproducible outside 19th October 1987 you cannot reduce it to a chain of causes and effects or even to a random generator that can then be reproduced or represented in a theoretical framework The Blank Swan is Elie s highly original treatise on the financial markets presenting a totally revolutionary rethinking of derivative pricing and technology It is not a diatribe against Nassim Taleb s The Black Swan but criticises the whole background or framework of predictable and unpredictable events white and black swans alike i e the very category of prediction In this revolutionary book Elie redefines the components of the technology needed to price and trade derivatives Most importantly and drawing on a long tradition of philosophy of the event from Henri Bergson to Gilles Deleuze to Alain Badiou and on a recent brand of philosophy of contingency embodied by the speculative materialism of Quentin Meillassoux Elie redefines the market itself against the common perceptions of orthodox financial theory general equilibrium theory and the sociology of finance This book will change the way that we think about derivatives and approach the market If anything derivatives should be renamed contingent claims where contingency is now absolute and no longer derivative and the market is just its medium The book also establishes the missing link between quantitative modelling no longer dependent on probability theory but on a novel brand of mathematics which Elie calls the mathematics of price and the reality of the market **American Book Publishing Record Cumulative, 1950-1977** R.R.
