The Diesel Builders Fairbanks Morse And Lima Hamilton Special 98:

The Diesel Builders John F. Kirkland, 1985 **Extra Twenty-two Hundred South** , 1982 *Technology and Culture* , 1990 **Railway Age** , 1950 Railfan & Railroad , 1990 **American Engineer, Car Builder and Railroad Journal** , 1954-07 **From Steam to Diesel** Albert J. Churella, 1998-08-03 This overview of the leading locomotive producers in the United States during the twentieth century shows how they responded to a radical technological change the replacement of steam locomotives by diesels The locomotive industry provides a valuable case study of business practices and dramatic shifts in innovation patterns since two companies General Motors and General Electric that had no traditional ties to locomotive production demolished established steam locomotive manufacturers Albert Churella uses many previously untapped sources to illustrate how producers responded to technological change particularly between the 1920s and the 1960s Companies discussed include the American Locomotive Company ALCo the Baldwin Locomotive Works the Lima Locomotive Works Fairbanks Morse the Electro Motive Division of General Motors and General Electric A comparative work of business history and the history of technology the book is not a complete history of any locomotive builder nor does it explore the origins of the diesel engine in great detail What it does and does superbly is to demonstrate how managers addressed radical shifts in technology and production methods Churella reveals that managerial culture and corporate organizational routines more than technological competency per se allowed some companies to succeed yet constrained the actions of others He details the shift from small batch custom manufacturing techniques in the steam locomotive industry to mass production methods in the diesel locomotive industry He also explains that chance events and fortuitous technological linkages helped to shape competitive patterns in the locomotive industry *Books in Series, 1876-1949* R.R. Bowker Company, 1982 **Alco Locomotives** Brian Solomon, 2009-12-15 Once the second largest steam locomotive builder in the U S American Locomotive Company Alco produced 75 000 locomotives among them such famous examples as the 4 6 4 Hudsons and 4 8 4 Niagaras built for the New York Central and the 4 6 6 4 Challengers and 4 8 8 4 Big Boys built for the Union Pacific Alco Locomotives is the first book to tell the full story of this company central to American railroad history and beloved by railfans for its rich heritage and its underdog appeal Noted rail historian Brian Solomon looks back at the founding of Schenectady Locomotive Works in 1848 and proceeds to cover that company s merger with several smaller locomotive builders in 1901 to form Alco Solomon describes the locomotives that made Alco s name around the world from the standard designs like Mikados Atlantics and Mallets to the more powerful and flashy post World War I models His detailed richly illustrated narrative re creates the drama of a tough ambitious company in the American tradition rising again and again to the demands of an ever changing industry and economy Solomon also covers Alco electrics built in partnership with GE as well as the company s successful and quirky diesel offerings including the RS 2 and RS 3 road switchers FA FB road freight units PA road passenger diesel and the wares of Canadian affiliate Montreal Locomotive Works Enlivened by

numerous historical photographs modern images curious details and firsthand accounts this history is a complete fascinating and fitting tribute to a true icon of American railroading *Out of Steam* Jeffrey W. Schramm, 2010 About the Author Jeff Schramm is an associate professor of history at Missouri University of Science and Technology Book Jacket
