The Dutch Down Under 16062006:

The Dutch Down Under Nonja Peters, 2006 The celebrations of the first 400 years of relations between The Commonwealth of Australia and The Kingdom of The Netherlands mark a very special and important event for both countries The shared relationship between the two countries was first established in 1606 when the Dutch vessel Duyfken mapped part of the coast near present day Weipa Cape York Peninsula of the continent that would in time become known as Australia This event led to further encounters between early maritime pioneers and traces of early Dutch influence are still found in such Australian place names as Tasmania and Cape Leeuwin Over time subsequent global events forged closer links between the two countries as part of the post war migration from a war ravaged Europe to the population hungry Australia almost 170 000 Dutch nationals arrived down under It was this migration from Europe in the 1950s that allowed the Australian economy to move forward into more prosperous times Today there are some 270 000 Australian residents who were either born in the Netherlands or who claim Dutch ancestry The Dutch Down Under 1606 2006 provides illuminating commentary from 23 contributing authors on the history of these relationships and on the socio economic and cultural impact of the migration on both Dutch residents in Australia and their families in the Netherlands Language, Culture and the Dynamics of Age Anna Duszak, Urszula Okulska, 2011 The book explores the role of age in communication under consideration of various age groups the elderly middle aged teenagers children genres cultures and languages The social skewing of the contributions explains the book's focus on discourse mediated social identities with age implicated as a viable controller of how social action is strategically deployed for alignment and alienation accommodation and divergence The studies in the book show the particular importance of the discursive construction of age in the face of new challenges of globalization increased human mobility and rising intergenerational conflicts **Dutch and Flemish Literature as World Literature** Theo D'haen, 2019-07-25 The recent return of world literature to the centre of literary studies has entailed an increased attention to non European literatures but in turn has also further marginalized Europe's smaller literatures Dutch and Flemish Literature as World Literature shows how Dutch language literature from its very beginnings in the Middle Ages to the present has not only always taken its cue from the major literary traditions of Europe and beyond but has also actively contributed to and influenced these traditions The contributors to this book focus on key works and authors providing a concise yet highly readable history of Dutch language literature and demonstrating how this literature is anchored in world literature **Migration Documentary Films in Post-War Australia , Navigating by the Southern Cross** Kenneth Morgan, 2021-01-28 In this comprehensive study Kenneth Morgan provides an authoritative account of European exploration and discovery in Australia The book presents a detailed chronological overview of European interests in the Australian continent from initial speculations about the Great Southern Land to the major hydrographic expeditions of the 19th century In particular he analyses the early crossings of the Dutch in the 17th century the exploits of English buccaneer adventurer

The Global Lives of Things Anne Gerritsen, Giorgio Riello, 2015-11-19 The Global Lives of Things considers the ways in which things ranging from commodities to works of art and precious materials participated in the shaping of global connections in the period 1400 1800 By focusing on the material exchange between Asia Europe the Americas and Australia this volume traces the movements of objects through human networks of commerce colonialism and consumption It argues that material objects mediated between the forces of global economic exchange and the constantly changing identities of individuals as they were drawn into global circuits It proposes a reconceptualization of early modern global history in the light of its material culture by asking the question what can we learn about the early modern world by studying its objects This exciting new collection draws together the latest scholarship in the study of material culture and offers students a critique and explanation of the notion of commodity and a reinterpretation of the meaning of exchange It engages with the concepts of proto globalization the first global age and commodities consumption Divided into three parts the volume considers in Part One Objects of Global Knowledge in Part Two Objects of Global Connections and finally in Part Three Objects of Global Consumption The collection concludes with afterwords from three of the leading historians in the field Maxine Berg Suraiya Faruqi and Paula Findlen who offer their critical view of the methodologies and themes considered in the book and place its arguments within the wider field of scholarship Extensively illustrated and with chapters examining case studies from Northern Europe to China and Australia this book will be essential reading for students of global history

Feeling Things Stephanie Downes, Sally Holloway, Sarah Randles, 2018-01-13 This interdisciplinary essay collection investigates the various interactions of people feelings and things throughout premodern Europe It focuses on the period before mass production when limited literacy often prioritised material methods of communication The subject of materiality has been of increasing significance in recent historical inquiry alongside growing emphasis on the relationships between objects emotions and affect in archaeological and sociological research The historical intersections between materiality and emotions however have remained under theorised particularly with respect to artefacts that have continuing resonance over extended periods of time or across cultural and geographical space Feeling Things addresses the need to develop an appropriate cross disciplinary theoretical framework for the analysis of objects and emotions in European history with special attention to the need to track the shifting emotional valencies of objects from the past to the present and from one place and cultural context to another The collection draws together an international group of historians art historians curators and literary scholars working on a variety of cultural literary visual and material sources Objects considered include books letters prosthetics religious relics shoes stone and textiles Many of these have been preserved in international galleries museums and archives while others have remained in their original locations even as their contexts have changed over time The chapters consider the ways in which emotions such as despair fear grief hope love and wonder become inscribed in and ascribed to these items producing emotional objects of significance and agency Such objects can be harnessed to create affirm or express individual relationships as for example in religious devotion and practice or in the construction of cultural communal and national identities
