terms of the debate It recognises that a new academic consensus is slowly emerging on a view of tolerance that is reasonable in two senses Firstly of reflecting the capacity of seeing the other s viewpoint secondly on the relatively limited extent to which toleration can be granted It reflects the cross thematic and cross disciplinary nature of such discussions dissecting a number of debates such as liberalism and communitarianism public and private multiculturalism and the politics of identity and a number of disciplines moral legal and political philosophy historical and educational studies anthropology sociology and psychology A group of distinguished authors explore the complexities emerging from the new debate They scrutinise with analytical sophistication the philosophical foundation the normative content and the broadly political implications of a new culture of toleration for diverse societies Specific issues considered include the toleration of religious discrimination in employment city life and community social ethos publicity justice and reason and ethics The book is unique in resolutely looking forward to the theoretical and practical challenges posed by commitment to a conception of toleration demanding empathy and understanding in an ever diversifying world

The Metaphysics of Self and World Elie Maynard

Adams,1991 A great fissure occurred in Western civilization in the early modern period with the divorce between the humanities and the sciences and the rise of scientific naturalism The Metaphysics of Self and World is a philosophical exploration of the relationship between the individual the culture and the world It is in the author s words a philosophy of the humanities a philosophy of humanity and a philosophy of social reality It explores the implications of a world view that would integrate the perspective of the sciences with humanistic ways of thought E M Adams claims that we do violence to ourselves as human beings by trying to fit into the world as delineated in scientific categories Rejecting cultural subjectivism and scientific naturalism he argues for the irreducibility and validity of the categories of the humanities and for a fully developed humanistic philosophy of self and world In generating this world view he utilizes the humanities as a source of culture therapy in order to close the fissure in Western civilization Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina Chapel Hill He has written numerous books and articles and a festschrift celebrating his work Mind Value and Culture Essays in Honor of E M Adams edited by David Weissbord was published in 1989
