**The Heath Introduction to Fiction** ,1977      Charlotte Perkins Gilman's the Yellow Wall-paper and the History of Its Publication and Reception Julie Bates Dock,2010-11-01      Thematic Guide to Popular Short Stories Patrick A. Smith,2002-10-30 Providing easy access to information on nearly 450 short stories this unique guide surveys a wide spectrum of world literature canonical works and contemporary fiction Librarians and teachers will find multiple purposes for this expertly compiled resource which can be employed in much the same way as a standard bibliography Educators will appreciate the concise annotations arranged alphabetically by author that form the core of this work Insightful critical statements synthesize plot summaries and identify the thematic content of each short story A theme guide utilizes the nearly 100 theme headings matching those at the start of each entry allowing the user to quickly locate story titles on related themes and construct reading lists based on individual interests and needs Another component designed to aid librarians offers one bibliography that lists the anthologies from which the stories are drawn Works Cited and one comprised of a number of recent anthologies that can be adapted for the classroom Further Reading In addition to the theme index the general subject and author indexes make this a user friendly and invaluable resource      Computational Creativity Research: Towards Creative Machines Tarek R. Besold,Marco Schorlemmer,Alan Smaill,2014-12-04 Computational Creativity Concept Invention and General Intelligence in their own right all are flourishing research disciplines producing surprising and captivating results that continuously influence and change our view on where the limits of intelligent machines lie each day pushing the boundaries a bit further By 2014 all three fields also have left their marks on everyday life machine composed music has been performed in concert halls automated theorem provers are accepted tools in enterprises R D departments and cognitive architectures are being integrated in pilot assistance systems for next generation airplanes Still although the corresponding aims and goals are clearly similar as are the common methods and approaches the developments in each of these areas have happened mostly individually within the respective community and without closer relationships to the goings on in the other two disciplines In order to overcome this gap and to provide a common platform for interaction and exchange between the different directions the International Workshops on Computational Creativity Concept Invention and General Intelligence C3GI have been started At ECAI 2012 and IJCAI 2013 the first and second edition of C3GI each gathered researchers from all three fields presenting recent developments and results from their research and in dialogue and joint debates bridging the disciplinary boundaries The chapters contained in this book are based on expanded versions of accepted contributions to the workshops and additional selected contributions by renowned researchers in the relevant fields Individually they give an account of the state of the art in their respective area discussing both theoretical approaches as well as implemented systems When taken together and looked at from an integrative perspective the book in its totality offers a starting point for a re integration of Computational Creativity Concept Invention and General Intelligence making visible
