HSA Heritage Auctions Space Exploration Auction Catalog #6033 Marsha Dixey,2009-09 *Atmospheric Flight in the Twentieth Century* P. Galison,A. Roland,2013-03-07 All technologies differ from one another They are as varied as humanity's interaction with the physical world Even people attempting to do the same thing produce multiple technologies For example John H White discovered more than 1 1000 patents in the 19th century for locomotive smokestacks Yet all technologies are processes by which humans seek to control their physical environment and bend nature to their purposes All technologies are alike The tension between likeness and difference runs through this collection of papers All focus on atmospheric flight a twentieth century phenomenon But they approach the topic from different disciplinary perspectives They ask disparate questions And they work from distinct agendas Collectively they help to explain what is different about aviation how it differs from other technologies and how flight itself has varied from one time and place to another The importance of this topic is manifest Flight is one of the defining technologies of the twentieth century Jay David Bolter argues in *Turing's Man* that certain technologies in certain ages have had the power not only to transform society but also to shape the way in which people understand their relationship with the physical world A defining technology says Bolter resembles a magnifying glass which collects and focuses seemingly disparate ideas in a culture into one bright sometimes piercing ray 2 Flight has done that for the twentieth century

Ketchum,2015-10-12 America s story is made up of many elements but through it have coursed two main streams that have nourished and carried a people forward to a destiny that was beyond all imagining when the story began One of these is an idea that goes back to the rim of recorded time It was first a dim gnawing hope that the future lay in a magic land off to the west Once that land was found it drew people to it like a magnet It is easy to say that it was gold or precious stones or land that led them on for it was all of these Yet it was more and here was the second great stream of American history There was something that literally drove people westward goading them across the endless mountains through steep passes across searing plains and desert into the face of terrors known and those unguessed It was vision It was courage It was at times the sheer joy of overcoming fantastic obstacles And it was also the conviction that what they were doing was different from anything that had happened before that nothing would ever be quite the same again and that the world would be a better place for what they had accomplished
