#### The Of Nature Natural History In The United States 18251875:

William Stimpson and the Golden Age of American Natural History Ronald Scott Vasile, 2018-06-19 William Stimpson was at the forefront of the American natural history community in the latter half of the nineteenth century Stimpson displayed an early affinity for the sea and natural history and after completing an apprenticeship with famed naturalist Louis Agassiz he became one of the first professionally trained naturalists in the United States In 1852 twenty year old Stimpson was appointed naturalist of the United States North Pacific Exploring Expedition where he collected and classified hundreds of marine animals Upon his return he joined renowned naturalist Spencer F Baird at the Smithsonian Institution to create its department of invertebrate zoology He also founded and led the irreverent and fun loving Megatherium Club which included many notable naturalists In 1865 Stimpson focused on turning the Chicago Academy of Sciences into one of the largest and most important museums in the country Tragically the museum was destroyed in the Great Chicago Fire of 1871 and Stimpson died of tuberculosis soon after before he could restore his scientific legacy This first ever biography of William Stimpson situates his work in the context of his time As one of few to collaborate with both Agassiz and Baird Stimpson's life provides insight into the men who shaped a generation of naturalists the last before intense specialization caused naturalists to give way to biologists Historians of science and general readers interested in biographies science and history will enjoy this compelling biography Nature and Culture: American Landscape and Painting, 1825-1875, With a New Preface Barbara Novak Altschul Professor of Art History Barnard College and Columbia University (Emerita), 2007-01-05 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Frederich Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book Review An admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes Time The Emergence of Genetic Rationality Phillip Thurtle, 2011-06-01 The emergence of genetic science has Magazine profoundly shaped how we think about biology Indeed it is difficult now to consider nearly any facet of human experience without first considering the gene But this mode of understanding life is not of course transhistorical Phillip Thurtle takes us

back to the moment just before the emergence of genetic rationality at the turn of the twentieth century to explicate the technological economic cultural and even narrative transformations necessary to make genetic thinking possible The rise of managerial capitalism brought with it an array of homologous practices all of which transformed the social fabric With transformations in political economy and new technologies came new conceptions of biology and it is in the relationships of social class to breeding practices of middle managers to biological information processing and of transportation to experiences of space and time that we can begin to locate the conditions that made genetic thinking possible desirable and seemingly natural In describing this historical moment The Emergence of Genetic Rationality is panoramic in scope addressing primary texts that range from horse breeding manuals to eugenics treatises natural history tables to railway surveys and novels to personal diaries It draws on the work of figures as diverse as Thorstein Veblen Jack London Edith Wharton William James and Luther Burbank The central figure David Starr Jordan naturalist poet eugenicist educator provides the book with a touchstone for deciphering the mode of rationality that genetics superseded Building on continental philosophy media studies systems theory and theories of narrative The Emergence of Genetic Rationality provides an interdisciplinary contribution to intellectual and scientific history science studies and cultural studies It offers a truly encyclopedic cultural history that challenges our own ways of organizing knowledge even as it explicates those of an earlier era In a time in which genetic rationality has become our own common sense this discussion of its emergence reminds us of the interdependence of the tools we use to process information and the conceptions of life they animate Subjects Srikanth Reddy, 2012-06-13 Theoretical accounts of modern American poetry often regard literary texts as the expression of a subjectivity irremediably fractured by the dividing practices of power In Changing Subjects Srikanth Reddy seeks to redress our critical bias toward a fatalistic poetics of rupture and fragmentation by foregrounding a fluent tradition of writers from Walt Whitman to John Ashbery who explore digression rather than disjunction as a rhetorical strategy for the making of modern poetry Mapping the ramifying topography of literary digression Changing Subjects offers a wide ranging anatomy of the excursus within twentieth century American poetics Moving from aesthetics to the archive to narratology to figures of identity Reddy considers various spheres in which American writers revisit and revise our models of purposeful discourse by cultivating a poetics of digression in modern literature In new readings of authors such as Wallace Stevens Marianne Moore Frank O Hara and Lyn Hejinian this study proposes that changing the subject offers a digressive method for negotiating the vexing complexities of art knowledge history and subjectivity under the curious conditions of modernity The book concludes with a survey of Elliptical strategies employed by a new generation of poets writing in the wake of John Ashbery s aleatory craft who seek to extend the digressive project of American poetry into the twenty first century

*Unpacked* Blake C. Scott,2022-11-15 Unpacked offers a critical novel perspective on the Caribbean's now taken for granted desirability as a tourist's paradise Dreams of a tropical vacation have become a quintessential aspect of the modern

Caribbean as millions of tourists travel to the region and spend extravagantly to pursue vacation fantasies At the beginning of the twentieth century however travelers from North America and Europe thought of the Caribbean as diseased dangerous and according to many observers the white man's graveyard How then did a trip to the Caribbean become a supposedly fun and safe experience Unpacked examines the historical roots of the region s tourism industry by following a well traveled sea route linking the US East Coast with the island of Cuba and the Isthmus of Panama Blake C Scott describes how the cultural and material history of US imperialism became the heart of modern Caribbean tourism In addition he explores how advances in tropical medicine perceptions of the tropical environment and development of infrastructure and transportation networks opened a new playground for visitors Women, Travel, and Science in Nineteenth-Century Americas Nina Gerassi-Navarro, 2017-11-15 This book offers a new and insightful look at the interconnections between the United States Brazil and Mexico during the nineteenth century Gerassi Navarro brings together U S and Latin American Studies with her analysis of the travel narratives of Frances Calder n de la Barca and Elizabeth Cary Agassiz Inspired by the writings of Alexander von Humboldt these women in their travels expand his views on the tropics to include a social dimension to their observations on nature culture race and progress in Brazil and Mexico Highlighting the role of women as a new kind of observer as well as the complexity of connections between the United States and Latin America Gerassi Navarro interweaves science politics and aesthetics in new transnational frameworks **Geographies of Nineteenth-Century Science** David N. Livingstone, Charles W. J. Withers, 2011-07-15 Here David Livingstone and Charles Withers gather essays that deftly navigate the spaces of science in this significant period and reveal how each is embedded in wider systems of meaning authority and identity Posthuman Southeast Asia Ignasi Ribó, 2024-12-15 Posthuman Southeast Asia Ecocritical Entanglements Across Species Boundaries explores the posthuman in Southeast Asia from various ecocritical perspectives and encourages further and deeper entanglements between ecocritics and the bountiful but also threatened multispecies ecologies of this region Southeast Asia is an area where humans and nonhumans have always been deeply entangled from the indigenous and ancient traditions of animism to the variegated and blooming creativity of contemporary literature art music drama film and other media This book expands and enriches Southeast Asian ecocritical scholarship by incorporating posthumanist and new materialist perspectives Across twelve chapters this volume explicitly engages with Southeast Asian texts cultural practices and environmental issues from the broadly conceived theoretical framework of posthuman ecocriticism They provide a uniquely inflected perspective on the literary multimedia and artistic dimensions of contemporary nature cultures in Southeast Asia as part of a concerted effort to disclose the complex entanglements of humans and nonhumans across the region Herman Melville in Context Kevin J. Hayes, 2018-01-11 Herman Melville in Context provides the fullest introduction in one volume to the multifaceted life and times of Herman Melville a towering figure in nineteenth century American and world literature The book grounds the study of Herman Melville's writings to the

world that influenced their composition publication and recognition making it a valuable resource to scholars teachers students and general readers Bringing together contributions covering a wide range of topics the collection of essays covers the geographical social cultural and literary contexts of Melville's life and works as well as its literary reception Herman Melville in Context will enable readers to approach Melville's writings with fuller insight and to read and understand them in a way that approximates the way they were read and understood in his time **Uniting in Measures of Common Good** Darren Ferry, 2008 In a compelling and comprehensive treatment of the nineteenth century voluntary association movement Darren Ferry situates these organizations within the much larger framework of the construction of collective liberal identities He shows that by attempting to transcend the political religious class and ethnic divisions of their constituencies voluntary societies acted as cultural mediators in the reproduction transmission and contestation of liberal values throughout central Canadian society Ferry examines a wide selection of voluntary societies mechanics institutes mutual benefit organizations agricultural associations temperance societies and literary and scientific associations. He reinterprets the history of these organizations in terms of their own internal tensions over liberal doctrines and the effect of social cultural and economic change and compares the effects of liberalism on rural and urban associations and on societies in both English and French Canada Anchored with an array of archival documentation minute books lectures associational periodicals personal papers pamphlets and tracts Uniting in Measures of Common Good illuminates the experience of ordinary Canadians withi the voluntary association movement and as well as the relations of the movement with the larger liberal society the Twenty-first Century Barry Tharaud, 2010 While previous collections of Emerson essays have tended to be a sort of stock taking or retrospective look at Emerson scholarship this collection follows a more prospective trajectory for Emerson studies based on the recent increase in global perspectives in nearly all fields of humanistic studies **Transnational Spaces:** Celebrating Fifty Years of Literary and Cultural Intersections at NeMLA Carine Mardorossian, Simona Wright, 2023-01-31 This volume celebrates fifty years of NeMLA s important presence in the world of academia with a collection of essays that adopt a transnational critical lens With the present selection we intend to add our voices to the ongoing debate centered on the renegotiation of space national and cultural geographies to foster both the re thinking of language s and literature s not exclusively in English and the study of race gender sexuality and class within and across national boundaries Most pertinently for this collection we hope to add meaningful material to produce new theoretical paradigms and to rethink the role and significance of the humanities in today s world In this light Transnational Spaces Celebrating Fifty Years of Literary Cultural and Language Intersections at NeMLA offers a contribution to the study of our present transnational condition from the point of view of an organization the Northeast Modern Language Association that since its inception in 1969 has sought to provide a space of encounter debate and open intellectual exchange for all its members as well as for the academe at large The essays contained in this volume emphasize the interdependency and interrelations engendered by the globalized world in

which we live highlighting the possibility to create new knowledge and forms of understanding across the boundaries of nationhood and region At the same time they remind us that the present situation calls for a radical self examination of a history of systemic racism which continues to produce episodes of police brutality rationalizes cultural and economic exclusion and normalizes the incarceration of African Americans and illegal immigrants including children and minorities In this light with this volume we hope to have provided inclusive egalitarian and cosmopolitan spaces of encounter exchange A Companion to the History of Science Bernard Lightman, 2019-11-12 The Wiley Blackwell Companion to the History of Science is a single volume companion that discusses the history of science as it is done today providing a survey of the debates and issues that dominate current scholarly discussion with contributions from leading international scholars Provides a single volume overview of current scholarship in the history of science edited by one of the leading figures in the field Features forty essays by leading international scholars providing an overview of the key debates and developments in the history of science Reflects the shift towards deeper historical contextualization within the field Helps communicate and integrate perspectives from the history of science with other areas of historical inquiry Includes discussion of non Western themes which are integrated throughout the chapters Divided into four sections based on key analytic categories that reflect new approaches in the field The Columbia Guide to American Environmental History Carolyn Merchant, 2005-09-14 How and why have Americans living at particular times and places used and transformed their environment How have political systems dealt with conflicts over resources and conservation This is the only major reference work to explore all the major themes and debates of the burgeoning field of environmental history Humanity's relationship with the natural world is one of the oldest and newest topics in human history. Numbers, 2007-09-10 As past president of both the History of Science Society and the American Society of Church History Ronald L Numbers is uniquely qualified to assess the historical relations between science and Christianity In this collection of his most recent essays he moves beyond the clich's of conflict and harmony to explore the tangled web of historical interactions involving scientific and religious beliefs In his lead essay he offers an unprecedented overview of the history of science and Christianity from the perspective of the ordinary people who filled the pews of churchesor loitered around outside Unlike the elite scientists and theologians on whom most historians have focused these vulgar Christians cared little about the discoveries of Copernicus Newton and Einstein Instead they worried about the causes of the diseases and disasters that directly affected their lives and about scientists preposterous attempts to trace human ancestry back to apes Far from dismissing opinion makers in the pulpit Numbers closely looks at two the most

influential Protestant theologians in nineteenth century America Charles Hodge and William Henry Green Hodge after decades of struggling to harmonize Gods two revelations in nature and in the Biblein the end famously described Darwinism as atheism Green on the basis of his careful biblical studies concluded that Ussher's chronology was unreliable thus opening the door for Christian anthropologists to accommodate the subsequent discovery of human antiquity In Science without God Numbers traces the millennia long history of so called methodological naturalism the commitment to explaining the natural world without appeals to the supernatural By the early nineteenth century this practice was becoming the defining characteristic of science in the late twentieth century it became the central point of attack in the audacious attempt of intelligent designers to redefine science Numbers ends his reassessment by arguing that although science has markedly changed the world we live in it has contributed less to secularizing it than many have claimed Taken together these accessible and authoritative essays form a perfect introduction to Christian attitudes towards science since the 17th century

A Companion to the History of American Science Georgina M. Montgomery, Mark A. Largent, 2015-10-07 A Companion to the History of American Science offers a collection of essays that give an authoritative overview of the most recent scholarship on the history of American science Covers topics including astronomy agriculture chemistry eugenics Big Science military technology and more Features contributions by the most accomplished scholars in the field of science history Covers pivotal events in U S history that shaped the development of science and science policy such as WWII the Cold War and the Women's Rights movement Doctoring the South Steven M. Stowe, 2011-01-20 Offering a new perspective on medical progress in the nineteenth century Steven M Stowe provides an in depth study of the midcentury culture of everyday medicine in the South Reading deeply in the personal letters daybooks diaries bedside notes and published writings of doctors Stowe illuminates an entire world of sickness and remedy suffering and hope and the deep ties between medicine and regional culture In a distinct American region where climate race and slavery and assumptions about southernness profoundly shaped illness and healing in the lives of ordinary people Stowe argues that southern doctors inhabited a world of skills medicines and ideas about sickness that allowed them to play moral as well as practical roles in their communities Looking closely at medical education bedside encounters and medicine s larger social aims he describes a country orthodoxy of local social medical practice that highly valued the art of medicine While not modern in the sense of laboratory science a century later this country orthodoxy was in its own way modern Stowe argues providing a style of caregiving deeply rooted in individual experience moral values and a consciousness of place and time **A Democracy of Facts** Andrew J. Lewis, 2011-04-05 Chronicles the story of American naturalists who came of age and stumbled toward a profession in the years after the American Revolution from publisher description Life Mapping as Cultural Legacy I-Chun Wang, Mary Theis, 2021-01-15 This volume celebrates a fascinating variety of nonfiction known as life writing This genre resonates quintessentially with the core of the humanities in its profoundly individual ways of fusing narrators with their narrative

subjects The book brings together scholars from around the world to explore the personal mapping of such narrators in the context of their cultural legacies The hybrid fusions themselves form several subgenres that complement each other as they affirm human dignity and values and our need for human connection felt at all times but especially during times of globally met threats The ever expanding forms of hybridography here along with testimonies diaries letters and journals bear witness to how individuals have contrived to overcome their own traumatic sources of pain and suffering to discover joy and how to further map their pathways forward The narratives not only communicate important information and aesthetic beauty needed to prolong troubled lives due to social anxiety or mental illness but also challenge sociocultural issues involving stigma migration racial discrimination and persecution human trafficking and ecological concerns Global in scope personal in focus and historically and culturally contextualized the analyses provided here once again illustrate how much we have to learn from each other
