Administration in Transition Demetrios Argyriades,O. P. Dwivedi,Joseph G. Jabbara,2007 Global developments over the past half century have transformed public administration and brought it to maturity as an autonomous discipline at the intersection of many important fields of study The trends and challenges which confront this discipline are analyzed in this festschrift which honors Gerald E Caiden and his numerous inputs to the field since his graduation in 1957 During five decades of research and teaching Dr Caiden s professional life has spread across four continents contributing greatly to the development of scholars and professional practitioners throughout the world Their advancement of our knowledge of the public sphere worldwide and support of enhanced practices combined with Caiden s scholarship continue to define vital aspects of contemporary public administration and its future prospects both locally and globally The administrative state which peaked in the 1950s and 1960s gave way to neoliberalism and the new public management during the 1980s and 1990s Already this is changing as new ideas and visions surface on the horizon Likewise priorities shifted as this volume shows Concerns with central planning with control command and direction gave way to greater emphasis on decentralization de bureaucratization and human resources development but also lately ethics and anti corruption strategies Due process rule of law defense against arbitrariness and protection and promotion of human and citizens rights have also re emerged as fields of growing concern precisely on account of government s visible deficit in these regards We are constantly on the move but whether our direction will lead to the garrison state or to a democratic facilitative state as one contributor argues remains a central issue which calls for exploration and debate In paying Gerald Caiden the tribute he so richly deserves this festschrift put together by scholars from around the world traces and accounts for developments and bring us up to date It is a fifty year perspective on a field in rapid change a rich and varied compendium which represents a valuable addition to the literature on public administration a necessary tool for training and research as well as a useful companion for students and practitioners of public service globally American Book Publishing Record ,2003 **Encyclopedia of Law & Society:**

F-O David Scott Clark,2007 Provides more than seven hundred alphabetical entries covering the interaction of law and society around the globe including the sociology of law law and economics law and political science psychology and law and criminology **How Law Works** Ross Cranston,2006 Access to justice equality before the law and the rule of law are three fundamental values underpinning the civil justice system This book examines these values and how although they do not have great leverage in decision making by the courts they are a crucial foundation of the civil justice system and a powerful argument for arrangements such as legal aid the impartial application of law and the independence of the judiciary The second theme of this book concerns the role of procedure often regarded as of secondary importance compared with substantive law Taking the definition of procedure at its widest the book discusses Lord Woolf s Inquiry and demonstrates

how procedural reform can maximize a fundamental value like access to justice This linkage is furthered in a later analysis of access to justice comparatively in relation to civil and commercial law Thirdly the book looks at understanding how law works and how it could be made to work better and concludes that this demands both a knowledge of law and of law s context This theme offers a framework for the book which then goes on to deal with the machinery of the law and discusses what the courts do civil procedure and the ethics of lawyer s conduct all in relation to the broader context of access to justice This broader context of the law is particularly prominent in the latter half of the book which deals with various dimensions of the impact of the law Including studies of civil and social rights in practice the role of European law in the destruction of Aboriginal society in Australia and commercial law in Asia these examples raise issues about the gap between the law and reality the potential law has to destroy social patterns and the relationship between law and economic development This is a thought provoking critical exploration which has much to offer those interested in the operation of the civil justice system
