Geometry and Atmosphere C. Alan Short, Peter Barrett, Alistair Fair, Monty Sutrisna, 2016-12-05 Drawing on detailed design construction and financial histories of six prominent Performing Arts buildings with budgets ranging from 3.4 million to over 100 million *Geometry and Atmosphere* presents unique and valuable insights into the complex process of building for the arts Each theatre project from tailor made spaces for avant garde companies to iconic and innovative receiving houses yields surprising and counter intuitive findings For each of the six projects the authors have interviewed all those involved Combining these interviews with exhaustive archival research the authors then provide cross case analysis which is distilled into guidance for all stakeholders as they transform their initial vision into built reality In particular the book challenges the technical focus of existing design guides for the Performing Arts by suggesting that current practice in briefing and design does not serve the Arts community especially well It shows that there is a need for an approach in which the focus is firmly rooted in the delivery of the driving artistic vision As well as being of interest to architects urban designers and those involved in theatre studies this book will be useful to other sectors where public money is spent on major building projects

images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind **Peter Brook** Michael
