The Oracle's Heart Evangeline Moonwhisper, The ancient temple of Delphi stood sentinel against the Mediterranean sky its weathered columns catching the first light of dawn Cassandra Thorne pressed her palms against the cool marble feeling the familiar tingle that preceded her visions At twenty six she had learned to recognize the signs the way the world seemed to shimmer at its edges the sudden clarity that preceded the overwhelming flood of images from futures yet to unfold Not now she whispered to herself closing her eyes and trying to center her breathing She had come to Greece seeking answers about her gift not more questions The Oracle of Delphi had been silent for over a millennium but the ancient stones still hummed with psychic energy that called to her across continents Dr Helena Vasquez her mentor and the leading researcher in parapsychology had arranged for Cassandra to spend three months here studying the historical connection between the site and prophetic abilities What Helena didn t know was that Cassandra s visions had been growing stronger and more frequent sometimes overwhelming her completely The vision struck without warning A man with storm gray eyes and dark hair standing in this very spot His hands reaching for hers across time

Achieving Quality in Software S. Bologna, G. Bucci, 2013-11-11 Software quality is a generalised statement difficult to agree or disagree with until a precise definition of the concept of Software Quality is reached in terms of measurable quantities Unfortunately for the software technology the basic question of what to measure how to measure when to measure how to deal with the data obtained are still unanswered and are also closely dependant on the field of application In the past twenty years or more there have been a number of conferences and debates focusing on the concept of Software Quality which produced no real industrial impact Recently however the implementation of a few generic standards ISO 9000 IEEE etc has produced and improved application of good practice principles at the industrial level As a graduate in PHYSiCS I still believe it is a long way before the concept of Software Quality can be defined exactly and

measured if ever This is way I think the AQuIS series of conferences is important its object begin to provide a platform for the transfer of technology and know how between Academic Industrial and Research Institutions in the field of Software Quality Their objects are to provide a forum for the introduction and discussion of new research breakthroughs in Software Quality to provide professional Software Quality engineers with the necessary exposure to the results of current research to expose the research community to the problems of practical application of new results
