## **The Origins Of Alliances Cornell Studies In Security Affairs:**

*The Origins of Alliance* Stephen M. Walt, 2013-08-09 How are alliances made In this book Stephen M Walt makes a significant contribution to this topic surveying theories of the origins of international alliances and identifying the most important causes of security cooperation between states In addition he proposes a fundamental change in the present conceptions of alliance systems Contrary to traditional balance of power theories Walt shows that states form alliances not simply to balance power but in order to balance threats Walt begins by outlining five general hypotheses about the causes of alliances Drawing upon diplomatic history and a detailed study of alliance formation in the Middle East between 1955 and 1979 he demonstrates that states are more likely to join together against threats than they are to ally themselves with threatening powers Walt also examines the impact of ideology on alliance preferences and the role of foreign aid and transnational penetration His analysis show however that these motives for alignment are relatively less important In his conclusion he examines the implications of balance of threat for U S foreign policy *The Origins of Alliances* Stephen M. Walt, 1986 Alliance Decision-Making in the South China Sea Joseph A. Gagliano, 2019-03-04 The combination of rising Chinese power and longstanding territorial disputes has drawn increased attention and threats to the Asia Pacific region Five smaller powers contest Beijing's claims Malaysia the Philippines Vietnam Brunei and Indonesia with the United States viewed as the most likely counterbalance to coercive behavior towards them However only one of these five states the Philippines has maintained a guarantee of protection through alliance with the US What factors have influenced state decisions to form security relationships with Washington and what does the evolution of these factors portend for future security relationships in the South China Sea Using research on U S policy preferences based on recently declassified material this book produces conclusions previously inaccessible beyond classified forums The author surveys recent alliance theory developments to examine relationships between claimant states and the US explores historical bilateral relations and considers the future of regional security relationships This book contributes to the fields of security studies foreign policy and international relations and expands beyond traditional concepts of defense alliances to explore security cooperation along a spectrum from allied to aligned to non aligned *Struggle for Alliance* Abdolrasool Divsallar, 2024-08-22 This book provides a comprehensive study of the complex impacts of the war in Ukraine on Russo Iranian relations and the resulting consequences for the international relations of the Middle East In contrast to dominant academic approaches which view Russo Iranian relations through the lens of an anti hegemonic agenda and confrontation with the US led international order this study presents an alternative angle stating that the war in Ukraine has sped up Moscow and Tehran's interdependency primarily because of the protective benefits that it brings to both states The book analyzes various debates about the impact of the war on Russo Iranian relations From the perspective of the emerging literature on authoritarian regionalism the book explores how domestic politics and common threat perceptions play a role in these states decisions to adjust to the systemic

changes caused by the war Chapters address how changes in the strategic environment are affecting Moscow and Tehran's perception of each other what factors contribute the most to both states decision to pursue greater cooperation and how they manage the new conflicts of interest raised by the war The book also queries whether relations continue to be based on tactical partnership or whether a stronger alliance between Moscow and Tehran is unfolding and what the consequences of such a struggle for alliance will be for the wider region

**How and Why States Defect from Contemporary Military Coalitions** Kathleen J. McNinnis, 2019-06-19 This book identifies contemporary military coalition defections builds a theoretical framework for understanding why coalition defection occurs and assesses its utility for both the scholarly and policy practitioner communities Drawing upon the author's own experiences managing the Afghanistan coalition for the Pentagon the volume builds a relevant policy and practical understanding of some of the key aspects of contemporary coalition warfare Ultimately it concludes that coalition defection is prompted by heightened perceptions of political and military risk Yet the choice of how to defect whether to completely withdraw forces or instead find another less risky way to participate is largely a function of international and alliance pressures to remain engaged

The Return of Great Power Rivalry Matthew Kroenig, 2020 This book seeks to answer to a central international politics why do great powers rise and fall It provides an innovative argument about how domestic political institutions are the key to a state's ability to amass power and influence in the international system This text also offers a sweeping historical analysis of democratic and autocratic competitors from ancient Greece through the Cold War This book employs a unique framework to understand and analyze the state of today's competition between the democratic United States and its autocratic competitors Russia and China

**State Behavior and the Nuclear Nonproliferation Regime** Jeffrey R. Fields, 2014-10-15 This is the first book length study of why states sometimes ignore oppose or undermine elements of the nuclear nonproliferation regime even as they formally support it Anchored by the Treaty on the Non Proliferation of Nuclear Weapons the nuclear nonproliferation regime is the constellation of agreements initiatives and norms that work in concert to regulate nuclear material and technology The essays gathered here show that attitudes on nonproliferation depend on a complex contingent decision calculus as states continually gauge how their actions within the regime will affect trade regional standing and other interests vital to any nation The first four essays take theoretical approaches to such topics as a framework for understanding challenges to collective action clandestine proliferation under the Bush and Obama administrations and its impact on regime legitimacy threat construction as a lens through which to view resistance to nonproliferation measures and the debate over the relationship between nuclear disarmament and nonproliferation Essays comprising the second part of the book use regional and state specific case studies to look at how U S security guarantees affect the willingness of states to support the regime question the perceived spoiler role of a vocal minority within the Non Aligned Movement challenge notions that Russia is using the regime to build a coalition hostile to the United States contrast nonproliferation strategies among Latin American

countries and explain the lag in adoption of an Additional Protocol by some Middle East and North African countries Getting countries to cooperate on nonproliferation efforts is an ongoing challenge These essays show that success must be measured not only by how many states join the effort but also by how they participate once they join *Islam in the Balance* Lawrence Rubin, 2014-06-04 *Islam in the Balance* Ideational Threats in Arab Politics is an analysis of how ideas or political ideology can threaten states and how states react to ideational threats It examines the threat perception and policies of two Arab Muslim majority states Egypt and Saudi Arabia in response to the rise and activities of two revolutionary Islamic states established in Iran 1979 and Sudan 1989 Using these comparative case studies the book provides important insight about the role of religious ideology for the international and domestic politics of the Middle East and in doing so advances our understanding of how why and when ideology affects threat perception and state policy Rubin makes clear that transnational ideologies may present a greater and more immediate national security threat than shifts in the military balance of power first because ideology or ideational power triggers threat perception and affects state policy second because states engage in ideational balancing in response to an ideological threat The book has significant implications for international relations theory and engages important debates in comparative politics about authoritarianism and Islamic activism Its findings about how an Islamist regime or state behaves will provide vital insight for policy creation by the US and its Middle East allies should another such regime or state emerge **Honor: A Phenomenology** Robert L. Oprisko, 2012-07-26 Honor is misunderstood in the social sciences The literature lacks both accuracy and precision in its conceptual development such that we no longer say what we mean because we have no idea what we are saying We use many terms to mean honor and mean many different ideas when we refer to honor Honor A Phenomenology is designed to fix all of these problems A ground breaking examination of honor as a metaphenomenon this book incorporates various structures of social control including prestige face shame and affiliated honor and the rejection of said structures by dignified individuals and groups It shows honor to be a concept that encompasses a number of processes that operate together in order to structure society Honor is how we are inscribed with social value by others and the means by which we inscribe others with social honor Because it is the means by which individuals fit in and function with society the main divisions internal within the psyche of the individual and external within the norms and institutions of society Honor is the glue that holds groups together and the wedge that forces them apart it defines who is us and who them It accounts for the continuity and change in socio political systems **The Palgrave Handbook of Contemporary Geopolitics** Zak Cope, 2024-11-01 The Palgrave Handbook of Contemporary Geopolitics features expert geopolitical analysis from internationally renowned experts in the field Reflecting the need for global analysis of national and regional politics The Handbook highlights the wider strategic economic cultural and security geography of contemporary international relations The contributions underscore the complex interplay between sociopolitical processes at the national level and their articulation at the regional and global levels *Iran's Nuclear Program and the Global South* M.

Klein,Condoleezza Rice,Julia Levy,2014-05-14 The United States failure to educate its students leaves them unprepared to compete and threatens the country s ability to thrive in a global economy and maintain its leadership role This report notes that while the United States invests more in K 12 public education than many other developed countries its students are ill prepared to compete with their global peers According to the results of the 2009 Program for International Student Assessment PISA an international assessment that measures the performance of 15 year olds in reading mathematics and science every three years U S students rank fourteenth in reading twenty fifth in math and seventeenth in science compared to students in other industrialized countries The lack of preparedness poses threats on five national security fronts economic growth and competitiveness physical safety intellectual property U S global awareness and U S unity and cohesion says the report Too many young people are not employable in an increasingly high skilled and global

economy and too many are not qualified to join the military because they are physically unfit have criminal records or have an inadequate level of education The report proposes three overarching policy recommendations implement educational expectations and assessments in subjects vital to protecting national security make structural changes to provide students with good choices and launch a national security readiness audit to hold schools and policymakers accountable for results and to raise public awareness
