Ondrako,2015-05-13 Drawing from the inaugural Newman Scotus Symposium this edited volume presents principles that converge with striking similarities in the thought patterns of Bl John Duns Scotus and Bl John Henry Newman With contributions from prominent philosophers and theologians this book argues in detail that Newman was overall sympathetic to many of the major themes characteristic of Scotus metaphysics and furthermore would be cautious about simply substituting historical dimensions and new hermeneutics for a sound metaphysical approach The more metaphysical approach of Scotus uncovers the implicit notional foundations of Newman's

thought while the more phenomenological style of Newman assists the reader in grasping the realism and profound spirituality lying behind the more abstract presentation of Scotus Topics range from the Franciscan Scotistic motive of the Incarnation the Scotistic position of sacramental theology to intuition and certitude scientific form and real assent uncoupling Scotus from Kant the will as the power to self determine as the essential characteristic of the will with love as its object and its relationship to the intellect as moved by its object the truth and more Features of this edited work include A unique text that offers connections and contexts between Newman and Scotus including a genuine unity of approach and substantially identical convictions concerning the nature of theology and how to conduct it Contributions from prominent philosophers and theologians such as John T Ford Timothy P Noone Cyril O Regan Peter D Fehlner Olivier Boulnois Edward J Ondrako Bishop Geoffrey Rowell Mary Beth Ingham Patricia Hutchison and Robert C Christie and includes the first hand account from Deacon Jack Sullivan of the miracle that led to Newman s beatification End of chapter study questions This book is intended for upper level undergraduate and graduate students professors and interested persons intuiting modern sensitivity to freedom in its relationship to the will and intellect Scotus and Newman provide an indispensable basis for grasping the profound insights of the Church in the Modern World Gaudium et Spes We've Never Been Alone Paul Von Ward,2011-09-01 Whether you call them gods angels ETs or aliens sufficient proof now exists that beings more advanced than humans have influenced our history Evidence suggests that these outsiders shaped our religions genes technology and cultures In fact they may have provided the impetus for modern civilization Paul Von Ward investigates why modern science and religion refuse to address the possibility that humans interact with Advanced Beings ABs He reviews sacred texts myths and legends from the Old Testament Hebrew texts and the Vedas to the Greek myths Sumerian tablets and other historical sources to make the link between religions their gods and alien intervention He shows how this history of AB intervention has been suppressed and challenges readers to reexamine the origins of notions like divine revelation to find common ground among the world s cultures and religions Previously published as God Genes and Consciousness
