perennial subjects of literature film popular culture and political debate Is this preoccupation with catastrophe questionable alarmism or complacent passivity Or are there certain truths that can be revealed only in apocalypse In *The Future as Catastrophe* Eva Horn offers a novel critique of the modern fascination with disaster which she treats as a symptom of our relationship to the future Analyzing the catastrophic imaginary from its cultural and historical roots in Romanticism and the figure of the Last Man through the narratives of climatic cataclysm and the Cold War s apocalyptic sublime to the contemporary popularity of disaster fiction and end of the world blockbusters Horn argues that apocalypse always haunts the modern idea of a future that can be anticipated and planned Considering works by Lord Byron J G Ballard and Cormac McCarthy and films such as *12 Monkeys* and *Minority Report* alongside scientific scenarios and political metaphors she analyzes catastrophic thought experiments and the question of survival the choices legitimized by imagined states of exception and the contradictions inherent in preventative measures taken in the name of technical safety or political security What makes today s obsession different from previous epochs is the sense of a catastrophe without event a stealthily creeping process of disintegration Ultimately Horn argues imagined catastrophes offer us intellectual tools that can render a future shadowed with apocalyptic possibilities affectively epistemologically and politically accessible **Thinking**

Throughout history many dictators developed a primeval almost sadistic view of society and felt that power was for the taking Some of these dictators went to the finest educators in the world and learned how to mesmerize their citizens converting them to their own twisted ideologies They began the process by corrupting the military generals who controlled the work force and weapons that could control their people One individual during World War Two set in motion a contingency plan in the event he wasn t successful in accomplishing his goal of ruling the world and that was Adolf Hitler Toward the end of the Second World War Hitler ordered his Army to enter Prague He moved his munitions factory to Prague s underground city because the Russians were getting too close to Berlin To temper his paranoia he created a back up plan That s when he created *The Doomsday Device* As such he planned an apocalypse so devastating it was beyond description and one in which the world could never recover Thirty five years later a letter surfaced reminding five people that the device could still be a real threat to the world and had to be disarmed Rick Benedict was a professor at Brown University at the time Little did he know that soon he was going to be embroiled in a world of betrayal and deceit that would shake the very foundation of his own beliefs **Weapons of Science Fiction** John Hamilton, 2006-08-15 Introduces young readers to the world of science fiction
