The Dynamics Of Boreal Coniferous Forests:

The Dynamics of Boreal Coniferous Forests Kullervo Kuusela, 1990 Biomass Burning and Global Change: Biomass burning in South America, Southeast Asia, and temperate and boreal ecosystems, and the oil fires of Kuwait Joel S. Levine, 1996 Global Biomass Burning provides a convenient and current reference on such topics as the remote sensing of biomass burning from space the geographical distribution of burning the combustion products of burning in tropical temperate and boreal ecosystems burning as a global source of atmospheric gases and particulates the impact of biomass burning gases and particulates on global climate and the role of biomass burning on biodiversity and past global extinctions

Pub desc *Coniferous Forests* F.A. Andersson, 2005-12-15 Starting with an account of the history and distribution of the conifers this volume describes the most important areas in Asia Europe North and South America with conifer forests The last in the Ecosystem of the World series it deals with the functional aspects of the conifer forests such as physiology production biomass and more *The SAGE Handbook of Biogeography* Andrew Millington, Mark Blumler, Udo Schickhoff, 2011-09-22 A superb resource for understanding the diversity of the modern discipline of biogeography and its history and future especially within geography departments I expect to refer to it often Professor Sally Horn University of Tennessee As you browse through this fine book you will be struck by the diverse topics that biogeographers investigate and the many research methods they use Biogeography is interdisciplinary and a commonly voiced concern is that one biogeographer may not readily understand another's research findings A handbook like this is important for synthesising situating explaining and evaluating a large literature and pointing the reader to informative publications Geographical Research A valuable contribution in both a research and teaching context If you are biologically trained it provides an extensive look into the geographical tradition of biogeography covering some topics that may be less familiar to those with an evolution ecology background Alternatively if you are a geography student researcher or lecturer it will provide a useful reference and will be invaluable to the non biogeographer who suddenly has the teaching of an introductory biogeography course thrust upon them Adam C Algar *Frontiers of Biogeography* The SAGE Handbook of Biogeography is a manual for scoping the past present and future of biogeography that enable readers to consider where relevant how similar biogeographical issues are tackled by researchers in different schools In line with the concept of all SAGE Handbooks this is a retrospective and prospective overview of biogeography that will Consider the main areas of biogeography researched by geographers Detail a global perspective by incorporating the work of different schools of biogeographers Explore the divergent evolution of biogeography as a discipline and consider how this diversity can be harnessed Examine the interdisciplinary debates that biogeographers are contributing to within geography and the biological sciences Aimed at an international audience of research students academics researchers and practitioners in biogeography the text will attract interest from environmental scientists ecologists biologists and geographers alike Managing Boreal Forests in the

Context of Climate Change Seppo Kellomaki, 2017-02-03 In many places in the world forests dominate landscapes and provide various products Future climate change could profoundly alter the productivity of forest ecosystems and species composition Until now climate impact research has primarily focused on the likely impacts of rise in temperature increased atmospheric CO₂ concentration and varying precipitation on unmanaged forests The issue that now needs to be addressed is how to sustainably manage climate change for timber production and biomass Though climate change is a global issue impacts on forests depend on local environmental conditions and management methods so this book will look at the issue under varying local contexts *Ecological Bulletins, Targets and Tools for the Maintenance of Forest Biodiversity* Per Angelstam, Monica Donz-Breuss, Jean-Michel Roberge, 2009-05-06 Maintaining forest biodiversity by combining protection management and restoration of forest and woodland landscapes is a central component of sustainable development Evidence that there are threshold levels for how much habitat loss may be tolerated for viable populations of specialised species to be maintained Policy makers businesses and managers pose questions about how to balance use of renewable forest resources and conserve biodiversity Examples are presented on how biodiversity assessments can be made Proposes how the critical gaps in our knowledge identified throughout the book could be filled through macroecological research and international co operation

Restoration of Boreal and Temperate Forests John A. Stanturf, 2015-08-14 This substantially updated new edition reflects the growing recognition that large areas of forests are degraded globally This edition describes forest restoration in the context of rapid social economic environmental and climate change Covering the last decade s significant advances in forest restoration concepts and practice this edition has 16 new chapters and 19 thoroughly revised chapters This book is an excellent source of information for researchers managers policymakers and graduate students in forestry and ecology

The Forests Handbook, Volume 1 Julian Evans, 2008-04-15 The future of the world s forests is at the forefront of environmental debate Rising concerns over the effects of deforestation and climate change are highlighting the need both to conserve and manage existing forests and woodland through sustainable forestry practices The Forests Handbook written by an international team of both scientists and practitioners presents an integrated approach to forests and forestry applying our present understanding of forest science to management practices as a basis for achieving sustainability Volume One presents an overview of the world s forests their locations and what they are like the science of how they operate as complex ecosystems and how they interact with their environment Volume Two applies this science to reality it focuses on forestry interventions and their impact the principles governing how to protect forests and on how we can better harness the enormous benefits forests offer Case studies are drawn from several different countries and are used to illustrate the key points Development specialists forest managers and those involved with land and land use will find this handbook a valuable and comprehensive overview of forest science and forestry practice Researchers and students of forestry biology ecology and geography will find it equally accessible and useful

Forest Ecosystems and Environments Takashi Kohyama, Josep

Canadell, Dennis S. Ojima, Louis F. Pitelka, 2006-04-19 Coastal East and Southeast Asia are characterized by wet growing seasons and species rich forest ecosystems develop throughout the latitudinal and altitudinal gradients In this region the Global Change Impacts on Terrestrial Ecosystems in Monsoon Asia TEMA project was carried out as a unique contribution to the international project Global Change and Terrestrial Ecosystems TEMA aimed to integrate forest ecosystem processes from leaf physiology to meteorological budget and prediction of long term change of vegetation composition and architecture through demographic processes Special attention was given to watershed processes where forest ecosystem metabolism affects the properties and biogeochemical budgets of freshwater ecosystems and where rivers wetlands and lakes are subject to direct and indirect effects of environmental change This volume presents the scaling up concept for better understanding of ecosystem functioning **The Dynamic North** United States.
