argumentative texts so as to compare the pragmatic features of abstract entity anaphora in the two languages Then referent interpretation is explored within the SDRT framework Although SDRT can account for most of the instances of abstract entity anaphora it appears incompetent in dealing with some phenomena in the data of our study Seven problems in SDRT were found and corresponding solutions were proposed in an attempt to improve this theory In general this book has three aspects of significance Firstly it establishes abstract entity anaphora as an independent and a special kind of anaphora Secondly the research methods are the combination of empirical study and theoretical hypotheses as well as the coalescent of dynamic study and static study Thirdly the book is not limited to the application of SDRT to Mandarin Chinese and backward anaphora Instead based on the linguistic phenomena in the data it challenges and improves the theory and it even negates some aspects and meanwhile brings forward new solutions

Information and Creation German

Golitsyn, Vladimir Petrov, 2012-12-06 This book is devoted to one of the central problems of contemporary thinking for which C. P. Snow in 1959 coined the phrase of the Two Cultures. In this concept human endeavour is directed on one side to the forward looking sciences: mathematics, physics, chemistry, biology, etc. and on the other side to the backward looking humanities including psychology, linguistics, sociology, etc. In this dichotomy Snow saw no possibility of unification. On the other hand, the urge towards self-consistency and harmony in the mental and spiritual lives of both man and society as a whole is clearly one of the major forces of creativity, both scientific and artistic. This force aims at the unification of the Two Cultures in order to build an integrated self-consistent system for our intellectual life. Some attempts in this direction have been made before and will be described in this book. It is our aim to contribute to the achievement of an integrated mental life on the basis of information theory. In order to construct our model we examine the laws of information theory leading us to the deduction of the main laws inherent in both cultures. Thus we consider the evolution of both non-living and living matter, human behaviour, the phenomenon of language, the sphere of aesthetics, etc. We hope that our work will be useful both for researchers who are trying to derive different integral theories and for various other consumers of scientific knowledge meaning broad circles of intellectuals. *Significant Secular and Sacred Matters in America* H.G.

Hastings-Duffield, 2016-03-11 The text in *Significant Secular and Sacred Matters in America* contains nineteen commentaries: nine on secular matters and ten on sacred matters. The secular materials focus on various matters in American society including the reprehensible treatment of war veterans, racism by celebrities, Congress usurpation of citizens' rights and other issues. The sacred matters focus on religious privilege, the terrorism inherent in Christianity, the enigmatic genesis of Jesus, the evil of Yahweh, and more. An American citizen, military veteran, and secular humanist, which benighted people confuse with an atheist, wrote all the commentaries. His intent was to edify fellow citizens who perhaps never thought of matters the way the author does due to social indoctrination, indifference, and willful ignorance. *The Journal of the Bombay Natural History Society*, 1915
