*National Library of Medicine Audiovisuals Catalog* National Library of Medicine (U.S.), **Research Handbook on International Water Law** Stephen C. McCaffrey, Christina Leb, Riley T. Denoon, The Research Handbook on International Water Law surveys the field of the law of shared freshwater resources In some thirty chapters it covers subjects ranging from the general principles operative in the field and international groundwater law to the human right to water and whether international water law is prepared to cope with climate disruption The authors are internationally recognized experts in the field most with years of experience The Research Handbook is edited by three scholars and practitioners whose publications and work deal with the law of international watercourses *A Library of American Literature: Literature of the republic, pt. 3, 1835-1860* Edmund Clarence Stedman, Ellen Mackay Hutchinson, 1889 *A Library of American Literature from the Earliest Settlement to the Present Time* Edmund Clarence Stedman, Ellen Mackay (Hutchinson) Cortissoz, 1891 **American Reference Library**, 1924 *A Library of American Literature from the Earliest Settlement to the Present Time: Literature of the republic. pt. 3. 1835-1860* Edmund Clarence Stedman, Ellen Mackay Hutchinson, 1889 **Implementing International Watercourses Law through the WEF Nexus and SDGs** Zeray Yihdego, Julie Gibson, 2020-11-16 **Implementing International Watercourses Law through the WEF Nexus and SDGs** An Integrated Approach Illustrated in the Zambezi River Basin offers an innovative approach to the implementation of international water law IWL through integration of the law the WEF Nexus and SDGs *International Law and the War with Islamic State* Saeed Bagheri, 2021-07-15 Armed non state actors ANSAs often have economic aims that international law needs to respond to This book looks at the aim of Islamic State to create an effective government with an economically independent regime which focused on key oilfields in Syria and Iraq Having addressed Islamic State s quest for energy resources in Iraq and Syria the book explores the lawfulness of the war with Islamic State from a variety of legal aspects It has been attempted to make inroads into the most controversial aspects of contradictions in the application of jus ad bellum and jus in bello particularly when discussing the use of extraterritorial armed force against ANSAs and the obligation to protect civilian objects including the natural environment The question is whether the targeting of energy resources should be regarded as a violation of the laws of armed conflict even though the war with Islamic State being classified as a non international armed conflict Ambitious in scope the study argues that legal theory and state practice are still problematic as to how and under what conditions states can justify resorting to military force in foreign territory and to what extent they can target natural resources as being part of state property Furthermore it goes on to examine the differences between international and non international armed conflicts to establish whether there is any difference in the targeting of energy resources as part of the war sustaining capabilities of either party Through an examination of the Islamic State case the book offers a comprehensive study to close the gaps in jus in bello by contextualising the questions of civilian protection victimisation and state responsibility by

evaluating the US s war sustaining theory as a justification for the destruction of a territorial state s natural resources that are occupied by ANSAs      Library of Congress Subject Headings Library of Congress,Library of Congress.
