McClelland, Shauna L. Tominey, 2016-04-08 Self regulation has been identified as an important predictor of school readiness and academic achievement in young children Children who struggle with self regulation are at risk of experiencing peer rejection and academic difficulties Teachers report that there is high variability in children s self

regulatory abilities at school entry and that children with an accumulation of risk factors are especially likely to enter school without adequate self regulation skills Moreover early academic skills are often cumulative so children who fail to acquire early skills are at risk of falling behind their peers academically and facing achievement gaps that widen over time Although the relation between self regulation and school related outcomes has been clearly documented our understanding of the pathways through which self regulation influences early achievement and school success remains unclear This special issue considers previously neglected areas in the current understanding of self regulation The seven articles focus on issues including a the complex relations between self regulation and school readiness b predictors of self regulation and academic achievement and c advances in measurement of self regulation and related skills Research that continues to investigate the complex relations and mechanisms that influence early self regulation and related outcomes will inform policy and practice in ways that help all children develop the self regulation skills they need The volume will be of interest to researchers in the field of child development or education and educators and policy makers who are interested in promoting school readiness and academic success This book was originally published as a special issue of Early Education and Development

*Enhancing Student Achievement* Charlotte Danielson, 2002-11-15 Educators devoted to school reform focus all too often on the isolated components of K 12 education this is the essential premise of this powerful new book If we are truly committed to improving our schools the author contends then we must focus on the interdependence of variables that affect student learning both inside and outside the classroom The book is divided into three distinct parts In Part 1 Danielson introduces the Four Circles Model to define the criteria for successful school improvement Everything educators do to help their students learn must be based on what educators want school district or state goals believe values and principles and know educational research In Part 2 the author provides a framework for improving schools including curriculum team planning and policies and practices affecting students and connects every concept to the criteria presented in Part 1 She also provides a handy rubric at the end of each chapter both as a summary of main points and as a tool for educators to gauge the needs of their school Part 3 offers readers guidelines on how best to implement the framework using action planning Brimming with perceptive advice and thought provoking arguments this book is both a wake up call and a roadmap to success for those determined to provide students with the best education possible Note This product listing is for the Adobe Acrobat PDF version of the book
