Maass,2017-11-01 What is the story behind the paradoxical survival of small and weak states in a world of great powers and crude power politics And what explains the dramatic rise and fall in the number of states overtime following no consistent trend and not showing an immediately obvious direction or pattern The answers lie at the system level Small states survival is shaped by the international states system Small state survival and proliferation is determined first and foremost by features of and dynamics created at the states system As the states system changes and evolves the chances for small states to survive or proliferate change as well In fact a quantitative investigation confirms this showing that over the course of more than 31 2 centuries the number of small states did fluctuate widely and at times dramatically Unequal Actors in Equalising Institutions D. Panke,2013-10-24 This book explores the interplay between formal rules and real world differences questioning to what extent size related capacities between states matters for the dynamics and outcomes of negotiations taking place in the United Nations General Assembly an institution that strongly reflects the one state one vote principle

**A Small State's Guide to Influence in World Politics** Tom Long, Thomas Stephen Long, 2022 A complete guide for how small states can be strikingly successful and influential if they assess their situations and adapt their strategies Small states are crucial actors in world politics Yet they have been relegated to a second tier of International Relations scholarship In A Small State s Guide to Influence in World Politics Tom Long shows how small states can identify opportunities and shape effective strategies to achieve their foreign policy goals To do so Long puts small states relationships at the center of his approach Although small states are defined by their position as materially weaker actors vis a vis large states Long argues that this condition does not condemn them to impotence or irrelevance Drawing on typological theory Long builds an explanation of when and how small states might achieve their goals The book assesses a global range of cases both successes and failures and offers a set of tools for scholars and policymakers to understand how varying international conditions shape small states opportunities for influence

Small States in EU Policy-Making Anna-Lena Högenauer, Matúš Mišík, 2024-04-30 Small States in EU Policy Making analyses how small states try to impact European Union policy making through a range of strategies With the last rounds of enlargement and Brexit the number and weight of small states in the European Union have steadily increased At the same time small states face distinct challenges in different institutions which may impact their strategies Nonetheless the

existing literature primarily focuses on the Council of the European Union and the European Council and offers few insights into how small states navigate the other institutions The contributions to this volume examine how small states can wield influence in different institutions arguing that they do indeed pursue different strategies depending on institutional context The policy case studies on the EU's foreign and security policies confirm these findings small states can have influence in EU policy making and can create situations where their needs are met They are most likely to succeed when they build foreign policy coalitions when they anticipate major economic developments and when they manage to acquire a high level of expertise in a policy area However the case studies also show that there is a risk of small states becoming policy takers in cases where they cannot provide leadership in terms of ideas and expertise and or fail to build political weight through coalitions This book will be of interest to academics and practitioners of European politics and the EU in particular as well as policy makers and practitioners working on small states The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
