Innovations in Design & Decision Support Systems in Architecture and Urban Planning Jos P. Leeuwen, van,Harry J.P. Timmermans,2006-09-21 Traditionally the DDSS conferences aim to be a platform for both starting and experienced researchers who focus on the development and application of computer support in urban planning and architectural design This volume contains 31 peer reviewed papers from this year s conference This book will bring researchers together and is a valuable resource for their continuous joint effort to improve the design and planning of our environment *Participatory Design and Self-building in Shared Urban Open Spaces* Carolin Mees,2018-04-12 The book investigates the development of community gardens with self built structures which have existed as a shared public open space land use form in New York

City's low come neighborhoods like the South Bronx since the 1970s. These gardens have continued to be part of the urban landscape until today despite conflicting land use interests, changing residents' groups, and contradictory city planning. Both community gardens and self-built structures are created in a participatory design and self-built effort by urban residents and are an expression of the individual gardeners' preferences, their cultural background, and the decisions made by the managing residents' group in regards to the needs of their neighborhood. Ultimately, community gardens with self-built structures are an expression of the people's will to commonly use this land for open and enclosed structures next to their homes in the city and need to be included in future urban planning.
