Smart Business Metrics Measure What Really Counts And Manage What Makes The Difference:

Smart Business Metrics Bob Phelps, 2004 This work aims to give managers the tools to put the right measures in place It shows how quantitative measures can be applied to behaviour as well as to financial and operational decisions and provides the tools that enable managers to decide strategic actions based on factual analysis It also shows how smart metrics can produce joined up management all units working together to create value for the firm

Smart Business Metrics Bob Phelps, 2003 There are hundreds of books and articles about performance measurement but few that really explain how to design robust measurement systems This is one of the few that does and it does so in a way that is both engaging and actionable Andy Neely Chairman Centre for Business Performance Cranfield School of Management Performance management is a critical concern for service businesses and it is a difficult nut to crack Smart Business Metrics shows how to improve performance based on the facts of each individual business avoiding the trial and error approaches that often pass for expert

Performance Metrics Duke Okes, 2013-01-21 Which performance measures should you use The obvious answer is that it depends on what you want to achieve which someone else should never define for you After all it is your organization your department or your process But once you are clear about what you want to accomplish how do you sort through a variety of possible metrics and decide which are best Then given the list of metrics you believe are useful or necessary how do you define them in more detail to ensure that the right data are gathered at the appropriate frequency and that the resulting information gets to the right people so that they can make proper decisions This book provides a clarifying perspective for those who know that metrics need to be developed but are unsure as to the steps to follow in developing and deploying them It focuses on making sure that the metrics selected will guide people and processes in the direction the organization wants to go and allow continual evaluation of success Every highly effective organization is unique in some strategic way and the metrics used should reflect these differences Studying high performers can be useful from a learning standpoint but simply adopting what someone else is doing is likely to take you off your track and put you on theirs The concepts in this book will put you on the correct track and give you the tools to stay on it

Dimodica,2014-03-24 Prior to forming his own companies Paul DiModica was Vice President of Strategic Development for Renaissance Worldwide a public company headquartered in Boston Massachusetts Renaissance was originally called The Registry Inc which purchased the consulting firm Renaissance Solutions Inc owned by David Norton Norton co authored the book The Balanced Scorecard with Robert Kaplan After observing the Balanced Scorecard s original practice he identified what he believes is an operational gap in its design and ultimate deployment What he discovered was that the Balanced Scorecard is a strong management tool for large multi national companies such as Ford IBM American Express and others that have well established and mature business success models revenue growth year over year that is incremental and a corporate financial momentum that is solidified Although he recommends the Balanced Scorecard concept to any company that is comfortable with its business model being mature and is looking to build a business process that is focused on operational and systems excellence only based on his observations the Balanced Scorecard process holds back the agility and ability of small to medium sized businesses and large company divisions to adjust their business strategy as needed The Revenue Capture Scorecard is different Whereas the Balanced Scorecard process is a pre Internet approach the Revenue Capture Scorecard is a post Internet business agility tool focused on building a buyer strategy that is linked to revenue capture success It aligns sales marketing strategy and financial management simultaneously into a planned outbound revenue capture process that can help you adjust your business model as needed to proactively make quick decisions If you want to be or currently are a growth directed company then the Revenue Capture Scorecard is a great tool to help you achieve the business success you want Get your business on track
