Smokestack Diplomacy Robert G. Darst, 2001-01-02 Many environmental problems cross national boundaries and can be addressed only through international cooperation In this book Robert Darst examines transnational efforts to promote environmental protection in the USSR and in five of its successor states Russia Ukraine and the Baltic republics of Estonia Latvia and Lithuania from the late 1960s to the present The core of the book is a comparative study of three key issues nuclear power safety transboundary air pollution and Baltic Sea pollution Although expectations were high that the end of the Cold War and the breakup of the Soviet Union would lead to increased East West environmental cooperation the opposite has been true Russia and the other successor states have generally agreed to address such problems only when paid to do so Darst finds that post Cold War environmental cooperation has been most successful when there is an overlap between the environmental and economic interests of the successor states and those of their Western neighbors and when the foundation for cooperation was laid during the Cold War period The book is based on extensive original field research including interviews with diplomats government officials scientists and environmental activists in the successor states and Western Europe Its findings underscore the importance of the domestic and international political context in which international environmental policy making occurs It also deepens our understanding of the opportunities and dangers of positive inducements as a tool of international environmental policy

Clemens, 2001 Why isn't the Baltic region like the Balkans? Why have the Baltic republics not experienced ethnic cleansing border wars authoritarian rule and social chaos? Instead peace democracy and market economies have taken root since the fall of communism. Walter C. Clemens Jr here uses complexity theory which analyzes the role of self organization in complex adaptive systems to explain the Baltic miracle. He argues that the theory is a vital tool for understanding the remarkable strides made by Estonia Latvia and Lithuania since 1991 in coping with the transition to partnership with the new Europe. The Baltic peoples have adapted well to the demands of democracy a market economy and a constructive role in world affairs. The achievements of Estonia Latvia and Lithuania in the past decade are the more amazing when considered against the hundreds of years they were dominated by Teutonic knights Hanseatic merchants Sweden Russia and the USSR. Clemens uses this history as a springboard to analyze how Balts self organize today to meet the challenges of transition. One of the first books to apply complexity theory to a major sphere of world politics *The Baltic Transformed* will provoke constructive debate with its ambitious and well grounded analysis of not only Baltic developments but European security more generally. Despite its theoretical foundation the book is written in a clear and accessible style that will make it invaluable for courses on
