Solvability Theory of Boundary Value Problems and Singular Integral Equations with Shift Georgii S. Litvinchuk, 2000-09-30 *Solvability Theory of Boundary Value Problems and Singular Integral Equations with Shift* Georgii S. Litvinchuk, 2012-12-06 The first formulations of linear boundary value problems for analytic functions were due to Riemann 1857 In particular such problems exhibit as boundary conditions relations among values of the unknown analytic functions which have to be evaluated at different points of the boundary Singular integral equations with a shift are connected with such boundary value problems in a natural way Subsequent to Riemann's work D Hilbert 1905 C Haseman 1907 and T Carleman 1932 also considered problems of this type About 50 years ago Soviet mathematicians began a systematic study of these topics The first works were carried out in Tbilisi by D Kveselava 1946 1948 Afterwards this theory developed further in Tbilisi as well as in other Soviet scientific centers Rostov on Don Kazan Minsk Odessa Kishinev Dushanbe Novosibirsk Baku and others Beginning in the 1960s some works on this subject appeared systematically in other countries e g China Poland Germany Vietnam and Korea In the last decade the geography of investigations on singular integral operators with shift expanded significantly to include such countries as the USA Portugal and Mexico It is no longer easy to enumerate the names of the all mathematicians who made contributions to this theory Beginning in 1957 the author also took part in these developments Up to the present more than 600 publications on these topics have appeared
