Solving Common Pediatric Problems An Algorithm Approach:

Solving Common Pediatric Problems Carmi Z. Margolis, 1988 *Practical Algorithms in Pediatric Endocrinology* Z. Hochberg, 2007-06-22 Algorithms provide a logical concise and cost effective approach to medical reasoning utilizing a concise step by step approach based upon clues from the history physical examination and laboratory studies algorithms help avoid excessive unnecessary procedures and testing The 2nd revised edition of *Practical Algorithms in Pediatric Endocrinology* deals with practical issues of child growth puberty diseases of the endocrine glands sexual differentiation as well as aberrations of water electrolyte mineral and carbohydrate metabolism Fifty clinical issues are covered by an algorithmic approach breaking down long lists and tables of differential diagnosis into smaller more manageable ones Common clinical symptoms signs and laboratory abnormalities are classified as they present themselves at the patients bedside This book is aimed at general practitioners and pediatricians in particular those who are not exposed to pediatric endocrine problems on a daily basis and at trainees in endocrinology and pediatric endocrinology as they acquire familiarity with clinical problem solving to make rational choices when facing clinical dilemmas A Karger Publishing Highlights 1890 2015 title **Problem Solving in Pediatric Imaging E-Book** Sarah Sarvis Milla, Shailee Lala, 2022-01-27 Optimize diagnostic accuracy with *Problem Solving in Pediatric Imaging* a new volume in the *Problem Solving in Radiology* series This concise title offers quick authoritative guidance from experienced radiologists who focus on the problematic conditions you are likely to see and how to reach an accurate diagnosis in an efficient manner Addresses the practical aspects of pediatric imaging perfect for practitioners fellows and senior level residents who may or may not specialize in pediatric radiology but need to use and understand it Integrates problem solving techniques throughout addressing questions such as If I see this what do I need to consider What are my next steps Presents content in a highly useful real world manner with sections on conventional radiography in the ED NICU PICU and CICU fluoroscopy body imaging and neuroradiology Imaging findings are merged with clinical anatomic developmental and molecular information to extract key diagnostic and therapeutic information Contains a section on special topics with chapters on radiation safety and quality assurance Features hundreds of high quality color images and anatomic drawings that provide a clear picture of what to look for when interpreting studies Illustrations conveying normal anatomy help you gain an in depth perspective of each pathology **Solving a Bus Driver Scheduling Problem: A Genetic Algorithm Approach (UUM Press)** Razamin Ramli, Haslinda Ibrahim, Lim Tze Shung, 2013-01-16 Many transport companies face problems in regulating their transport services due to various challenges and issues These problems affect the quality of the services provided especially in a university campus environment where students heavily depend on the university transport services for their daily commuting What are the problems faced by the management of the campus transport company What are the issues raised by the drivers operating the on campus buses Hence in assisting the management of the transport company the authors have identified the inefficiency of their bus driver

scheduling system as one of the main problems which needed to be tackled For that reason the authors developed an efficient bus driver scheduling model based on the Genetic Algorithm GA approach The GA model is able to provide some resolutions and insight in relation to these inquiries What are the constraints being considered in this bus driver scheduling problem How were the drivers break times being distributed in this GA approach How was the time taken to generate an efficient schedule For more information please visit <http://uumpress.uum.edu.my>

Auckland University Law Review ,1992 *Balanced Automation Systems II* Luis M. Camarinha-Matos, Hamideh Afsarmanesh, 2013-06-29 xiv box for Balanced Automation research in this area is still young and emerging In our opinion the development of hybrid balanced solutions to cope with a variety of automation levels and manual approaches is a much more challenging research problem than the search for a purely automatic solution Various research activities described in this book illustrate some of these challenges through the development proposals assisting tools and initial results In certain chapters however the balancing aspects are not yet achieved in the research area but their inclusion in this book is intended to give a broader and more comprehensive perspective of the multiple areas involved One important aspect to be noticed is the extension and application of the concept of balanced automation to all areas of the manufacturing enterprise Clearly the need for a balanced approach is not restricted to the shop floor components rather it applies to all other areas as illustrated by the wide spectrum of research contributions found in this book For instance the need for an appropriate integration of multiple systems and their perspectives is particularly important for the implantation of virtual enterprises Although both the BASYS 95 and the BASYS 96 conferences have provided important contributions approaches and tools for the implantation of balanced automation systems there are a number of areas that require further research AI in Learning: Designing the Future Hannele Niemi, Roy D. Bio-inspired Algorithms for Data Streaming and Visualization, Big Data Management, and Fog Computing

Simon James Fong,Richard C. Millham,2020-08-25 This book aims to provide some insights into recently developed bio inspired algorithms within recent emerging trends of fog computing sentiment analysis and data streaming as well as to provide a more comprehensive approach to the big data management from pre processing to analytics to visualization phases The subject area of this book is within the realm of computer science notably algorithms meta heuristic and more particularly bio inspired algorithms Although application domains of these new algorithms may be mentioned the scope of this book is not on the application of algorithms to specific or general domains but to provide an update on recent research trends for bio inspired algorithms within a specific application domain or emerging area These areas include data streaming fog computing and phases of big data management One of the reasons for writing this book is that the bio inspired approach does not receive much attention but shows considerable promise and diversity in terms of approach of many issues in big data and streaming Some novel approaches of this book are the use of these algorithms to all phases of data management not just a particular phase such as data mining or business intelligence as many books focus on effective demonstration of the effectiveness of a selected algorithm within a chapter against comparative algorithms using the experimental method Another novel approach is a brief overview and evaluation of traditional algorithms both sequential and parallel for use in data mining in order to provide an overview of existing algorithms in use This overview complements a further chapter on bio inspired algorithms for data mining to enable readers to make a more suitable choice of algorithm for data mining within a particular context In all chapters references for further reading are provided and in selected chapters the author also include ideas for future research
