Schneider,2004-08-02 A comparative study of defensible space and Crime Prevention Through Environmental Design CPTED as applied in the USA and the UK focusing particularly on urban experience **Private Security** Charles P. Nemeth,2022-12-28 Provides a history and theory while focusing on current best practices and practical security functions and analytic skills professionals need to be successful Outlines the increasing roles of private sector security companies as compared to federal and state law enforcement security roles since 9 11 Includes key terms learning objectives end of chapter questions Web exercises and numerous references throughout the book to enhance student learning Presents the diverse and expanding range of career options available for those entering the private security industry **Crime Prevention** Stephen Schneider,2014-12-16 In Crime Prevention Theory and Practice Second Edition Dr Schneider has updated every chapter in this reliable text using the latest research the most recently published articles and books and feedback from professors and students using the first edition Providing an introduction to dominant approaches key concepts theories and research **Problem-oriented Policing** Michael S. Scott,2000 **Crime Prevention Through Environmental Design** Garland F. White,2006 This book argues that the level of social and physical capital in communities can influence the amount of crime Communities are conceived as varying across positive weak or negative levels of social and physical capital Negative social and physical capital produce higher levels of disorder and crime Conversely positive social and physical capital enables residents to lower social problems in communities Weak social and physical capital allows more disorder because the community s defenses against crime and disorder are not strong enough to combat these problems The general perspectives include broken windows defensible space hot spots collective efficacy social disorganization underclass gang communities the post industrialized communities and routine activities theory The ameliorative programs include the weed and seed program the moving to opportunity program community policing and empowerment zones **Helping Communities Fight Crime** ,1997 *The NIJ Publications Catalog* National Institute of Justice (U.S.),1999 **NCJRS Catalog** ,1997 **RESIDENTIAL BURGLARY** George F. Rengert,2015-11-01 This updated and expanded new edition continues its unique approach and engrossing exploration of the elements of residential burglary Presented in five parts the first is concerned with what is on a burglar s mind when he or she considers whether to commit a burglary and which house to choose The second part is concerned with time and the opportunities and limits it places on both burglar and victim while the third section probes how burglaries are fit into space and the importance of perception of space in the burglary process The fourth section describes how burglars select a home to burglarize and uses Greenwich Connecticut as a model to contrast target and nontarget homes The fifth part reviews some of the nuts and bolts techniques and reasons for their use as described by burglars and addresses elements about housing architecture the burglary process and offers suggestions for controlling the problem of burglary It concludes with a discussion of changes in our lifestyles and communities and how these changes will play out in future patterns of residential burglary The authors draw on in depth

interviews with admitted burglars and the inclusion of the ideas and actual words of the burglars brings the material to life. The text continues to offer the most unique overview of residential burglary. It combines ethnographic research with study of official records and combines the strengths of both approaches. Handbook of Quantitative Criminology Alex R. Piquero, David Weisburd, 2009-12-16. Quantitative criminology has certainly come a long way since I was first introduced to a largely qualitative criminology some 40 years ago when I was recruited to lead a task force on science and technology for the President's Commission on Law Enforcement and Administration of Justice. At that time criminology was a very limited activity depending almost exclusively on the Uniform Crime Reports (UCR) initiated by the FBI in 1929 for measurement of crime based on victim reports to the police and on police arrests. A typical mode of analysis was simple bivariate correlation. Marvin Wolfgang and colleagues were making an important advance by tracking longitudinal data on arrests in Philadelphia, an innovation that was widely appreciated. And the field was very small. I remember attending my first meeting of the American Society of Criminology in about 1968 in an anteroom at New York University; there were about 25-30 people in attendance, mostly sociologists with a few lawyers thrown in. That Society today has over 3,000 members, mostly now drawn from criminology, which has established its own clear identity but augmented by a wide variety of disciplines that include statisticians, economists, demographers, and even a few engineers. This Handbook provides a remarkable testimony to the growth of that field. Following the maxim that if you can't measure it, you can't understand it, we have seen the early dissatisfaction with the UCR replaced by a wide variety of new approaches to measuring crime victimization and offending. **Community Policing** Geoffrey P. Alpert, Alexis Russell Piquero, 1998. This collection reviews and analyzes aspects of community policing that have prompted increased attention at both the academic and practitioner levels. **Interim Assessment of the HOPE VI Program Cross-Site Report** Mary Joel Hollin, 2011-11-17. In 1989 Congress established the Nat Comm on Severely Distressed Public Housing to explore the problems of troubled public housing developments and to establish a plan to address those problems by the year 2000. Following several years of research and public hearings, the Comm's 1992 final report identified the key factors that defined severely distressed housing: extensive physical deterioration of the property; a considerable proportion of residents living below the poverty level; a high incidence of serious crime; and management problems as evidenced by a large number of vacancies, high unit turnover, and low rent collection rates. The Comm members agreed that existing approaches for improving public housing were inadequate to address the needs of severely distressed developments and proposed the creation of a new program to address comprehensively the social and physical problems of distressed public housing communities. Originally called the Urban Revitalization Demonstration Program, this public housing revitalization program soon became known by the acronym HOPE VI: Homeownership and Opportunity for People Everywhere. In 1998, under the Dept of Housing and Urban Development (HUD), a 5-year evaluation of the HOPE VI program was begun. The Interim Assessment of the HOPE VI Program was designed to study program outcomes by collecting and analyzing data about 15
