Some Detached Houses:

Village Housing in the Tropics Keith Harry Hinchcliff, 1969 *Report of the United States Housing Corporation*
United States. Bureau of Industrial Housing and Transportation, 1919 **Village Housing in the Tropics** Jane
Drew, Maxwell Fry, Harry L Ford, 2013-11-26 Tropical Architecture although now a highly contested and debated term is the
name given to European modern architecture that has been modified to suit the climatic and sometimes cultural context of
hot countries These hot countries were labelled the tropics and were often European colonies or countries that had recently
won their independence Fry Drew's book written on the threshold of the end of the British Empire was one of the first
publications to offer practical advice to architects working in the tropics based on the empirical studies they conducted
whilst based in British West Africa during the Second World War The book with its numerous illustrations plans and easy to
follow explanations became a key manual for all architects working in hot climates and in particular those tasked with
designing dwellings and small town plans Although the Royal Engineers and Schools of Tropical Medicine had long been
designing and campaigning for better planning improved sanitation and had for example developed methods of cross
ventilation this book became an instant hit Tropical Architecture suddenly bloomed into its own distinct canon and by 1955
the Architectural Association had set up a course specialising in tropical architecture led for a short time by Fry Village
Housing in the Tropics had a significant impact when it was written on a profession that had had little guidance on working
in hot climates and on architecture students and universities who began to modify their courses to accommodate different
conditions Although from a post colonial perspective many scholars now associate this architecture as being a continuation of
the Imperial mission this does not reduce the significance of the publication Indeed Tropical Architecture is regarded as
being the forerunner to green architecture developing passive low energy buildings that are tailored to suit their climate and
built with local materials **Divided Tokyo** Tomoko Kubo, 2020-04-09 This book explores how and why Tokyo has been
divided over time in terms of living conditions First recent urban discourses that explain the transformation of Tokyo's urban
structure are examined along with social changes and the expansion of unequal residential conditions within the

Urban Land and Property Markets in Sweden Thomas Kalbro, Hans Mattsson, 2018-05-20 Originally published in 1995 Land and Property Markets in Sweden looks at the growing demand for an understanding of the urban land and property markets in Sweden The book offers detailed accounts of the policy legislative and regulatory frameworks of urban land and property markets in Sweden explaining how the markets operate and interact with the planning systems It also incorporates a review of the second home market which is particularly well developed in Sweden Fully detailed case studies are included to illustrate land development issues and the processes of purchase and sale of properties

The Pitmen's Requiem Peter Crookston, 2014-01-05 Peter Crookston's book offers a beautifully written journalist's account of a Durham mining village and the Great Northern Coalfield woven around the life of Robert Saint the composer of *Gresford* a brass band composition commemorating an earlier mining disaster in which 256 workers died Crookston brings his formidable observational qualities and writing skills as a journalist to produce a gripping narrative with utterly compelling characters and a heart rending culmination in the demise of the mining industry under assault by Thatcher The story is told in a gentle unpretentious way frequently giving voice to the characters themselves many of whom the author knew personally or got to know in preparing the book Apart from capturing a critical moment in a disappearing world the book offers a vantage point from which to reflect on our own culture and what we have lost in post industrial Britain the loss of community which did so much to sustain and nurture those miners in their desperate plights This is as much a history of culture and place as much as it is biography a book that is at once an elegy and a tribute
