**Plurality and Continuity** David A.J. Seargent,2012-12-06 by D M Armstrong In the history of the discussion of the problem of universals G F Stout has an honoured and special place For the Nominalist meaning by that term a philosopher who holds that existence of repeatables kinds sorts type and the indubitable existence of general terms is a problem The Nominalist s opponent the Realist escapes the Nominalist s difficulty by postulating universals He then faces difficulties of his own Is he to place these universals in a special realm Or is he to bring them down to earth perhaps turning them into repeatable properties of particulars universalia in res and repeatable relations between universals universalia inter res Whichever solution he opts for there are well known difficulties about how particulars stand to these universals Under these circumstances the Nominalist may make an important concession to the Realist a concession which he can make without abandoning his Nominalism He may concede that metaphysics ought to recognize that particulars have properties qualities perhaps and are related by relations But he can maintain these properties and relations are particulars not universals Nor indeed is such a position entirely closed to the Realist A Realist
