Teaching Dilemmas and Solutions in Content-Area Literacy, Grades 6-12 Peter Smagorinsky, 2014-08-19 Because literacy is not just the English teacher's job. Think literacy is just for English teachers. Not anymore. Nor should it be when you consider that each discipline has its own unique values and means of expression. These days it's up to all teachers to communicate what it means to be literate in their disciplines. Here finally is a book ambitious enough to tackle the topic across all major subject areas. Engage in this cross-disciplinary conversation with seasoned teachers and university researchers and learn how to develop curriculum and instruction that are responsive to students' needs across English language arts, science, social studies, mathematics, visual space, and music and drama. Peter Smagorinsky and his colleagues provide an insider's lens on both the states of their fields and their specific literacy demands, including reviews of current issues and state-of-the-art research informing literacy education. Scenario-based activities for reflection and discussion, typifying the dilemmas and challenges faced by practicing teachers. Considerations of the textual forms and conventions required in each discipline. Specific policy recommendations. Read this book on your own for immediate suggestions on how to improve literacy instruction within your course of study. Better yet, share it with colleagues and participate in a larger conversation about how your literacy expectations influence the ways students read and produce texts in other disciplines.

Exemplary Clinical Models of Teacher Education Sara R. Helfrich, Sara L. Hartman, 2023-06-01. Across settings, teacher education programs utilize innovative practices to prepare teacher candidates, yet rarely is this work shared in a way that is accessible to stakeholders. This book presents exemplary models utilized by universities in a variety of settings with the objective of sharing with readers a sampling of research-based teacher preparation models that are currently in place at accredited universities and colleges across the country in an effort to help others that are developing or redesigning their programs. Authors of the included chapters focused on the setting in which their college/university is located. Location impacts every aspect of a clinical model of teacher preparation, including the number and proximity of placements that are available for teacher candidates, access to resources, and diversity of experiences. The authors, in describing their clinical model, address how their location impacts their model, sharing information about the resources to which they have access, how they make use of available resources in potentially unique ways, as well as how they overcome a lack of resources to provide a meaningful and diverse experience for their candidates. Readers will be able to use this book to learn more about how similar colleges/universities are embracing their locations and resources to further the learning of their candidates and to implement these ideas within their own programs. All those involved in teacher preparation—state-level policy makers, university and P-12 administrators and educators who bridge university and school settings to work together to prepare teacher candidates—will benefit from this book. It can serve as a resource for these individuals to help inform them of how universities and colleges across the country are implementing a
