spirituality is in everyday life from complex to simple things This book attempts to compare and contrast spirituality and object oriented programming The first dictates how computer code should be written while the second acts as a mantra throughout nature It should be observed that these two regions have a striking likeness Since everything in nature derives from a single source an inheritance chain may be seen to exist It implies that everything derives from a fundamental source at index 0 Like us who arrived there thanks to our parents grandparents great grandparents and first ancestors The same procedure is used and is described in the OOP compliant code It s referred to as inheritance All other code is derived from a specific piece of code For instance one component in the code allows for the conversion of anything to the text Quantum computing and 5G technology also have a lot in common with spirituality After reading this book you will be able to appreciate the ideas presented in it that explain how to tie programming structures and concepts to spirituality
