**Poems for the Day** Sherril L. Carss, 2013-05-31 My book Poems for the Day is a compilation of Poems written at a deeply tormented time of my life I wrote my first poems when I was on a houseboat at Smiths Creek on Hawkesbury River in N S W a time that seemed to pull the Poems out of me That was in 2007 when I wrote my first Poetry only about six Poems in all I have included some of them in my book for you to read Then no more Poems until the Christmas of 2010 From Christmas 2010 through 2011 I wrote poems like Mad Woman they just poured out of me like a waterfall and no one was more surprised than me A very faith filled anxiety laced time and at this point space doesnt permit me to go in too Sufficient to day writing Poetry was a very comforting pass time for me and being a big fan and student of William Shakespeare Poetry has always held a Special Place in my Heart right from my Grade six reader where I discovered My Country by Dorothy McKellar It is my hope that whoever reads my poetry will be warmed inside out of by my Poems Poems like When someone you love is sick will help you to understand where I was coming from at a very difficult and creative time in my life Thank you for sharing my experience for you makes it all worthwhile

proposes new representations for embedded narratives and fictional entities for assessing the pace of a narrative and offers an empirical theory of audience response These notions are incorporated into an annotation scheme called NarrativeML The book identifies key issues that need to be addressed including annotation methods for long literary narratives the representation of modality and habituality and characterizing the goals of narrators It also suggests a future characterized by advanced text mining of narrative structure from large scale corpora and the development of a variety of useful authoring aids This is the first book to provide a systematic foundation that integrates together narratology AI and computational linguistics It can serve as a narratology primer for computer scientists and an elucidation of computational narratology for literary theorists It is written in a highly accessible manner and is intended for use by a broad scientific audience that includes linguists computational and formal semanticists AI researchers cognitive scientists computer scientists game developers and narrative theorists Table of Contents List of Figures List of Tables Narratological Background Characters as Intentional Agents Time Plot Summary and Future Directions
