On the Edge of the Banda Zone Roy Ellen,2003-08-31 The impact of the Indonesian spice trade on global and more particularly European history has been widely acknowledged Although more recent studies have gone beyond the preoccupation with the colonial relationship to provide a more Asiacentric view *On the Edge of the Banda Zone* is the first to focus an anthropological lens on the dynamics of trade in a specific area that incorporating the Seram Laut and Gorom archipelagoes and the adjacent mainland of east Seram in the Moluccas The point of departure for Roy Ellen s analysis is a description of trade relations in the east Seram zone between 1970 and 1990 but the wider importance of the data presented here is readily apparent For five hundred years and probably much longer it has served as a corridor between Eurasia and the southwestern Pacific and played a vital role in the production and distribution of nutmeg and other high value commodities that have for centuries had an impact on the global economy Drawing on the author s fieldwork as well as archival and secondary sources this ambitious eclectic volume demonstrates the enduring continuities in the local system as it comes into contact with the changing outside world It illuminates how barter ecological and ethnic divisions of labor exchange patterns and the organization of trade between the peoples of the New Guinea coast and east Seram help us make sense of long term cycles and trends

The Oxford Handbook of Polysynthesis Michael Fortescue,Marianne Mithun,Nicholas Evans,2017-09-28 This handbook offers an extensive crosslinguistic and cross theoretical survey of polysynthetic languages in which single multi morpheme verb forms can express what would be whole sentences in English These languages and the problems they raise for linguistic analyses have long featured prominently in language descriptions and yet the essence of polysynthesis remains under discussion right down to whether it delineates a distinct coherent type rather than an assortment of frequently co occurring traits Chapters in the first part of the handbook relate polysynthesis to other issues central to linguistics such as complexity the definition of the word the nature of the lexicon idiomaticity and to

typological features such as argument structure and head marking Part two contains areal studies of those geographical regions of the world where polysynthesis is particularly common such as the Arctic and Sub Arctic and northern Australia The third part examines diachronic topics such as language contact and language obsolescence while part four looks at acquisition issues in different polysynthetic languages Finally part five contains detailed grammatical descriptions of over twenty languages which have been characterized as polysynthetic with special attention given to the presence or absence of potentially criterial features

Racial Science and Human Diversity in Colonial Indonesia Fenneke Sysling, 2016-07-15 Indonesia is home to diverse peoples who differ from one another in terms of physical appearance as well as social and cultural practices The way such matters are understood is partly rooted in ideas developed by racial scientists working in the Netherlands Indies beginning in the late nineteenth century who tried to develop systematic ways to define and identify distinctive races Their work helped spread the idea that race had a scientific basis in anthropometry and craniology and was central to people's identity but their encounters in the archipelago also challenged their ideas about race In this new monograph Fenneke Sysling draws on published works and private papers to describe the way Dutch racial scientists tried to make sense of the human diversity in the Indonesian archipelago The making of racial knowledge it contends cannot be explained solely in terms of internal European intellectual developments It was on the ground that ideas about race were made and unmade with a set of knowledge strategies that did not always combine well Sysling describes how skulls were assembled through the colonial infrastructure how measuring sessions were resisted what role photography and plaster casting played in racial science and shows how these aspects of science in practice were entangled with the Dutch colonial Empire
