The Routledge History of Modern Latin American Migration offers a systematic account of population movements to and from the region over the last 150 years spanning from the massive transoceanic migration of the 1870s to contemporary intraregional and transnational movements. The volume introduces the migratory trajectories of Latin American populations as a complex web of transnational movements linking origin, transit, and receiving countries. It showcases the historical mobility dynamics of different national groups including Arab, Asian, African, European, and indigenous migration and their divergent international trajectories within existing migration systems in the Western Hemisphere including South America, the Caribbean, and Mesoamerica. The contributors explore some of the main causes for migration including wars, economic dislocation, social immobility, environmental degradation, repression, and violence. Multiple case studies address critical contemporary topics such as the Venezuelan exodus, Central American migrant caravans, environmental migration, indigenous and gender migration, migrant religiosity, transit and return migration, urban labor markets, internal displacement, the nexus between organized crime and forced migration, the role of social media and new communication technologies, and the effects of the COVID-19 pandemic on movement. These essays provide a comprehensive map of the historical evolution of migration in Latin America and contribute to define future challenges in migration studies in the region. This book will be of interest to scholars of Latin American and Migration Studies in the disciplines of history, sociology, political science, anthropology, and geography.

In the early twentieth century, the brutality of southern prisons became a national scandal. Prisoners toiled in grueling, violent conditions while housed in crude dormitories on what were effectively slave plantations. This system persisted until the 1940s when led by Texas, southern states adopted northern prison design reforms. Texas presented the reforms to the public as modern, efficient, and disciplined. Inside prisons, however, the transition to penitentiary cells only made the endemic violence more secretive, intensifying the labor division that privileged some prisoners with the power to accelerate state-orchestrated brutality and the internal sex trade. Reformers' efforts had only made things worse; now it was up to the prisoners to fight for change. Drawing from three decades of legal documents compiled by prisoners, Robert T. Chase narrates the struggle to change prison from within. Prisoners forged an alliance with the NAACP to contest the constitutionality of Texas prisons. Behind bars, a prisoner coalition of Chicano Movement and Black Power organizations publicized their deplorable conditions as slaves of the state and initiated a prison-made civil rights revolution and labor protest movement. These insurgents won epochal legal victories that declared conditions in many southern prisons to be cruel and unusual, but their movement was overwhelmed by the increasing militarization of the prison.

system and empowerment of white supremacist gangs that together declared war on prison organizers Told from the vantage point of the prisoners themselves this book weaves together untold but devastatingly important truths from the histories of labor civil rights and politics in the United States as it narrates the transition from prison plantations of the past to the mass incarceration of today

**The Returned** Claudia Masferrer, Erin R. Hamilton, Nicole Denier, 2024-03-21 In the first two decades of the 21st century more than two million Mexican migrants returned to Mexico from the United States Between 2010 and 2020 the number of people who returned to Mexico was so large that for the first time in at least fifty years more people entered Mexico from the United States than entered the United States from Mexico Many of these migrants were destined for urban areas and we know little about how they fare after they return to cities In *The Returned* sociologists Claudia Masferrer Erin R Hamilton and Nicole Denier examine the experiences of returned migrants in Mexico City one of the largest metropolitan areas in the world Masferrer Hamilton and Denier draw on interviews with former U S migrants living in Mexico City to better understand the experience of return migration to urban areas Each of the migrants they spoke with lived in the United States for long periods with noncitizen status during the last four decades During this time U S immigration policy became increasingly focused on restriction and enforcement which made it difficult for migrants to safely move back and forth across the border for work or to visit family without documentation The authors find that upon their return migrants in Mexico City felt disoriented and lost and had difficulty adapting to a massive urban environment where there is little support for returnees They struggled to translate their work experience from their time in the U S to find quality jobs Additionally many found their family lives upended as they reunited with or formed families in the U S Some found themselves separated from family members still in the U S with no ability to legally visit them Others brought their families back to Mexico some of whom were U S citizens and had never been to Mexico before They too struggled to adapt and integrate to life in Mexico City The authors use the experiences of return migrants to discuss policies and practices that would improve their lives and ease their reintegration To help with the disorientation they experience returnees proposed ongoing psychological support with mental health professionals who have knowledge and training in the social and legal issues that return migrants face Return migrants also advocated for policies to enhance skill matching job creation and entrepreneurship as many felt the occupational skills they developed in the U S were undervalued in Mexico To address family separation returnees argued for legal and policy reform to accommodate family reunification *The Returned* is an illuminating account of the difficulties faced by return migrants and their families in Mexico City

**New Migration Patterns in the Americas** Andreas E. Feldmann, Xóchitl Bada, Stephanie Schütze, 2018-07-25 This volume investigates new migration patterns in the Americas addressing continuities and changes in existing population movements in the region The book explores migration conditions and intersections across time and space relying on a multidisciplinary collaborative approach that brings together the expertise of transnational scholars with diverse theoretical orientations strengths and

methodological approaches Some of the themes this edited volume explores include main features of contemporary migration in the Americas causes composition and patterns of new migration flows and state policies enacted to meet the challenges posed by new developments in migration flows **Humanitarianism from Below** Alejandro Olayo-Méndez, 2025-08-05

Challenges the definition of humanitarian aid Aside from being one of the most important migration corridors in the world Mexico is becoming an immigrant destination itself with more and more migrants deciding or needing to stay in the country after failing to enter the United States In the absence of state aid migrant shelters have emerged as an informal welfare system for migrants asylum seekers refugees and deportees in Mexico Largely run by faith based humanitarian organizations these shelters have grown significantly in recent years Humanitarianism from Below examines the significance of these casas de migrantes migrant shelters in the migration process in Mexico The book also reviews the role of faith based humanitarian organizations whose engagement with migrants is perceived more as charity work than professional humanitarian work The volume argues that faith based humanitarian organizations work challenges traditional understandings of what counts as humanitarian aid It makes the case that in order to understand the full ecology of migration we need to understand not only how large organizations like the Red Cross work but also how these smaller and local entities with fewer resources interact with migrants on their journeys Most migration research tends to focus on its impact within home countries or in destination contexts rarely focusing on the actual migration process including the interactions that influence the course of the migration journey itself In conducting this research Alejandro Olayo M ndez traveled along migrant routes several times in order to gain knowledge about how migrants move and how they interact with the migrant shelters He offers a detailed look at the experiences and challenges of casas de migrantes in Mexico situating these faith based shelters as an integral part of Mexico s humanitarian ecosystem **3-Minute Mexican Spanish** Innovative Language Learning, SpanishPod101.com, 2017-08-10
