climates of different periods Changing concepts and practices of friendship characterized the intellectual social political and cultural panorama of medieval Europe including that of thiteenth century Iberia Subject of conquests and Reconquest land of convivencia but also of political instability as well as of secular and religious international power struggles the articulation of friendship within its borders is a particularly fraught subject to study Drawing on some of the encyclopaedic vernacular masterpieces produced in the scriptorium of The Wise King Alfonso X of Castile 1252-84 this study explores the political religious and social networks inter faith and gender relationships legal definitions as well as bonds of tutorship and companionship which were frequently defined through the vocabulary and rhetoric of friendship This study demonstrates how the values and meanings of amicitia often associated with classical Roman Visigothic and Eastern traditions were transformed to adapt to Alfonso X's cultural projects and political propaganda This book contributes to the study of the history of emotions and cultural histories of the Middle Ages while also emphasizing how Iberia was a peripheral but still vital ring in a chain which linked it to the rest of Europe while also occupying a central role in the historical and cultural developments of the Western Mediterranean

*Verbal Dueling in Heroic Narrative* Wards Parks, 2014-07-14 This work is a rare cross cultural study of one of the most universal dialogic genres heroic flyting or the verbal duel in which the heroes prior to physical combat make boastful claims that must be backed up through action in the arena of public contesting Long recognized as an elemental behavioral paradigm in human consciousness the contest has only recently emerged as a factor in the formation of Western intellectual traditions and modes

of discourse In presenting the verbal duel as a literary expression of the contest Ward Parks shows how flyting interfaces words and physical action He explores the place of flyting in the patterning of culture both Eastern and Western from Homeric and Old English martial narratives to current academic debate to such phenomena of popular culture as rap Parks studies flyting from a comparative standpoint to discover major generic and structural characteristics common to this activity in both its oral and written traditions Drawing his methodology from such fields as literary criticism socio biology linguistics and game theory he begins with an exploration of the nature and structure of contesting as it relates to flyting interactions He then examines the covert contract formation that binds the verbal and physical aspects of the duel analyzes the heroic generation of speeches and their dialogic interrelation in the flyting process itself and illustrates the adaptability of flyting patterns within a wide variety of cultural and ideological settings Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Maxwell, 1997 In Maxwell's Handbook for AACR2R the authors have included the 1993 Amendments of the Joint Steering Committee for Revision of Anglo American Cataloguing Rules provided all examples in the widely used MARC format considered rule interpretations of the major Anglo American national libraries updated all of the chapters and added a completely new chapter on manuscripts to correspond with AACR2R This revision of the cataloging classic follows the easy to use format of the previous edition and is packed with hundreds of examples that fully explain the cataloging rules to veteran and student catalogers alike **The Study of Chivalry** Howell Chickering, Thomas H Seiler, 1989-11-01 In a series of essays readers will find information about modern scholarship on the subject of chivalry and various suggestions for ways to teach some familiar and unfamiliar chivalric materials Short bibliographies are provided for teachers further use *La Chanson de Roland* Wolfgang van Emden, 1995 A Preface to the 'Nibelungenlied', 1987-06 This book aims to make available the necessary background for an informed reading of the Nibelungenlied the twelfth century epic perhaps best known to non Germans from Wagner's music dramas Two traditions of scholarly thought exist about the Nibelungenlied The first sees the poem as a development out of German heroic legend the second focuses on the work's location in the contemporary literary context at the end of the twelfth century The first and

older school deals with the evolution of the story over time and the question of how short heroic poems attained epic compass in the later Nibelungenlied The second seeks to interpret the poem in terms of the new emergence of Arthurian romance around 1200 The author attempts to bridge the gap between the two contending schools suggesting that neither approach precludes the other Although the Nibelungenlied poet drew the story itself from earlier heroic poems the author makes clear that the poet absorbed impulses from other types of literature as well The book is in three parts Part I discusses literary antecedents tracing the development of German heroic poetry from the Migration Age on then describing narrative practice in the twelfth century in historical and legendary epic on the one hand and romance on the other Part II analyzes the Nibelungenlied in its immediate literary context addressing possible sources and narrative innovations The author relates the story of the poem to the immediate antecedent versions of the legend that are now preserved only in the Norse Thidrek s Saga surveys recent general interpretations and suggests a literary historical analysis that can plot the Nibelungenlied more accurately on the literary map of the twelfth century Part III comprises previously untranslated texts and summaries of source materials bearing on the Nibelungenlied

**Feuding and Peace-Making in Eleventh-Century France** Stephen D. White, 2024-10-28 The essays in this volume discuss feuding and peacemaking in France during a period extending from the mid 10th to the early 12th century They treat various aspects of so called dispute processing a term coined by legal anthropologists to refer to the political processes and discursive practices through which conflict is mediated politically socially legally and culturally Each of the essays can be read both as one element in a larger critique of the theory that a feudal revolution in c 1000 initiated a century long era of feudal anarchy in France and as a study on a particular topic in medieval European legal and political history These include feuding violence the emotional dimensions of conflicts among elites the role of norms and normative argument in disputes the uses of unilateral ordeals and judicial duels in litigation and alternative strategies for terminating disputes

**The Sense of the Song of Roland** Robert F. Cook, 2019-05-15 This book offers a detailed interpretation of the Song of Roland one of the best known texts in all heroic literature It also includes a commentary that treats the poem s place in the eleventh or early twelfth century its importance to the society that produced it and the ways in which it is read today

**Anger's Past** Barbara H. Rosenwein, 2018-10-18 Books have rarely been written about the history of any emotion except love and shame and this volume is the very first on the meaning of anger in the Middle Ages Well aware of modern theories about the nature of anger the authors consider the role of anger in the social lives and conceptual universes of a varied and significant cross section of medieval people monks saints kings lords and peasants They are careful to distinguish between texts the sources on which historians must rely and the reality behind the texts They are sensitive as well to the differences between ideals and normative behavior The first eight essays in the volume focus on anger in the Latin West while the last two turn to the fringes of Europe the Celtic and Islamic worlds for purposes of comparison Barbara H Rosenwein concludes the volume with an essay on modern conceptions of anger and their implications

for understanding its role in the Middle Ages The essays reveal much that is new about medieval rituals of honor and status and illuminate the rationales behind such seemingly irrational practices as cursing feuding and the punishment of blinding

The Chivalric Turn David Crouch, 2019-06-06 The Chivalric Turn examines the medieval obsession with defining and practising superior conduct and the social consequences that followed from it Historians since the seventeenth century have tended to understand medieval conduct through the eyes of the writers of the Enlightenment viewing superior conduct as knightly behaviour and categorising it as chivalry Using for the first time the full range of the considerable twelfth and thirteenth century literature on conduct in the European vernaculars and in Latin The Chivalric Turn describes and defines what superior lay conduct was in European society before chivalry and maps how and why chivalry emerged and redefined superior conduct in the last generation of the twelfth century The emergence of chivalry was only one part of a major social change because it changed how people understood the concept of nobility which had consequences for the medieval understanding of gender social class violence and the limits of law
