The Drive In The Supermarket And The Transformation Of Commercial Space In Los Angeles 1914 1941:

The Drive-In, the Supermarket, and the Transformation of Commercial Space in Los Angeles, 1914-1941

Richard W. Longstreth, 2000-08-25 Longstreth explores the early development of two kinds of retail space that have become ubiquitous in the United States in the second half of the twentieth century Richard Longstreth is one of the few historians to focus on ordinary commercial buildings usually associated with commercial builders and real estate developers rather than architects and thus generally overlooked by historians of high architecture Here Longstreth explores the early development of two kinds of retail space that have become ubiquitous in the United States in the second half of the twentieth century One external is devoted to the circulation and parking of automobiles on retail premises Longstreth analyzes the origins of this development in the 1910s and 1920s with the super service station and then the drive in market The other type of space internal was introduced soon thereafter with the single story supermarket The most innovative aspect of the supermarket was how its interior was designed for high volume turnover of a large selection of goods with a minimum of staff assistance Longstreth focuses on Los Angeles the principal center for the development of both kinds of space during the period from the mid 1910s to the early 1940s This richly illustrated study integrates architectural cultural economic and urban factors to describe the evolution of retailing and how it has affected the urban landscape *Hollywood Cinema and the Real Los Angeles* Mark Shiel, 2013-02-15

Hollywood cinema and Los Angeles cannot be understood apart Hollywood Cinema and the Real Los Angeles traces the interaction of the real city its movie business and filmed image focusing on the crucial period from the construction of the first studios in the 1910s to the decline of the studio system fifty years later As Los Angeles gradually became one of the ten largest cities in the world the film industry made key contributions to its rapid growth and frequent crises in economic social political and cultural life Whether filmmakers engaged with the real city on location or recreated it on a studio set Los Angeles shaped the films that were made there and circulated influentially worldwide The book pays particular attention to early cinema slapstick comedy movies about the movies and film noir which are each explored in new ways with an emphasis on urban and architectural space and its representation as well as filmmaking style and technique Including many previously unpublished photographs and new historical evidence *Hollywood Cinema and the Real Los Angeles* gives us a never before seen view of the City of Angels *The Drive for Dollars* Jeffrey R. Brown, Eric A. Morris, Brian D. Taylor, 2023 The story of the interplay between finance freeways and urban form in the 20th century and their enduring impact on American cities and neighborhoods in the 21st American cities are distinct from almost all others in the degree to which freeways and freeway travel dominate urban landscapes In *The Drive for Dollars* Jeffrey R. Brown Eric A. Morris and Brian D. Taylor tell the largely misunderstood story of how freeways became the centerpiece of U S urban transportation systems and the crucial though usually overlooked role of fiscal politics in bringing freeways about The authors chronicle how the ways that we both raise and spend transportation revenue have shaped our transportation system

and the lives of those who use it from the era before the automobile to the present day They focus on how the development of one revolutionary type of road the freeway was inextricably intertwined with money With the nation s transportation finance system at a crossroads today this book sheds light on how we can best fund and plan transportation in the future The authors draw on these lessons to offer ways forward to pay for transportation more equitably provide travelers with better mobility and increase environmental sustainability and urban livability Cities of Light Sandy Isenstadt,Margaret Maile

Petty,Dietrich Neumann,2014-12-17 Cities of Light is the first global overview of modern urban illumination a development that allows human wakefulness to colonize the night doubling the hours available for purposeful and industrious activities Urban lighting is undergoing a revolution due to recent developments in lighting technology and increased focus on sustainability and human scaled environments Cities of Light is expansive in coverage spanning two centuries and touching on developments on six continents without diluting its central focus on architectural and urban lighting Covering history geography theory and speculation in urban lighting readers will have numerous points of entry into the book finding it easy to navigate for a quick reference and or a coherent narrative if read straight through With chapters written by respected scholars and highly regarded contemporary practitioners this book will delight students and practitioners of architectural and urban history area and cultural studies and lighting design professionals and the institutional and municipal authorities they serve At a moment when the entire world is being reshaped by new lighting technologies and new design attitudes the longer history of urban lighting remains fragmentary Cities of Light aims to provide a global framework for historical studies of urban lighting and to offer a new perspective on the fast moving developments of lighting today **The Interior**

Urbanism Theory Reader Gregory Marinic,2024-03-12 The Interior Urbanism Theory Reader expands our understanding of urbanism interiority and publicness from a global perspective across time and cultures From ancient origins to speculative futures this book explores the rich complexities of interior urbanism as an interstitial socio spatial condition Employing an interdisciplinary lens it examines the intersectional characteristics that define interior urbanism Fifty chapters investigate the topic in relation to architecture planning urban design interior architecture interior design archaeology engineering sociology psychology and geography Individual essays reveal the historical typological and morphological origins of interior urbanism as well as its diverse scales occupancies and atmospheres The Interior Urbanism Theory Reader will appeal to scholars practitioners students and enthusiasts of urbanism architecture planning interiors and the social sciences

Sumantran,Charles Fine,David Gonsalvez,2018-09-11 A call to redefine mobility so that it is connected heterogeneous intelligent and personalized as well as sustainable adaptable and city friendly The twentieth century was the century of the automobile the twenty first will see mobility dramatically re envisioned Automobiles altered cityscapes boosted economies and made personal mobility efficient and convenient for many We had a century long love affair with the car But today people

are more attached to their smartphones than their cars Cars are not always the quickest mode of travel in cities and emissions from the rapidly growing number of cars threaten the planet This book by three experts from industry and academia envisions a new world of mobility that is connected heterogeneous intelligent and personalized the CHIP architecture The authors describe the changes that are coming City administrators are shifting from designing cities for cars to designing cities for people Nations and cities will increasingly employ targeted user fees and offer subsidies to nudge consumers toward more sustainable modes The sharing economy is coaxing many consumers to shift from being owners of assets to being users of services The auto industry is responding with connected cars that double as virtual travel assistants and by introducing autonomous driving The CHIP architecture embodies an integrated multimode mobility system that builds on ubiquitous connectivity electrified and autonomous vehicles and a marketplace open to innovation and entrepreneurship Consumers will exercise choice on the basis of user experience and efficiency aided by intelligent advisors accessible through their mobile devices An innovative mobility architecture reconfigured for this century is a social and economic necessity this book charts a course for achieving it

Remembering Roadside America John A. Jakle, Keith A. Sculle, 2011-09-30 The use of cars and trucks over the past century has remade American geography pushing big cities ever outward toward suburbanization spurring the growth of some small towns while hastening the decline of others and spawning a new kind of commercial landscape marked by gas stations drive in restaurants motels tourist attractions and countless other retail entities that express our national love affair with the open road By its very nature this landscape is ever changing indeed ephemeral What is new quickly becomes old and is soon forgotten In this absorbing book John Jakle and Keith Sculle ponder how Roadside America might be remembered especially since so little physical evidence of its earliest years survives In straightforward and lively prose supplemented by copious illustrations historic and modern photographs advertising postcards cartoons roadmaps they survey the ways in which automobility has transformed life in the United States Asking how we might best commemorate and preserve this part of our past which has been so vital economically and politically so significant to the cultural aspirations of ordinary Americans yet so often ignored by scholars who dismiss it as kitsch they propose the development of an actual outdoor museum that would treat seriously the themes of our roadside history Certainly museums have been created for frontier pioneering the rise of commercial agriculture and the coming of water and steam powered industrialization and transportation especially the railroad Is now not the time the authors ask for a museum forcefully exploring the automobile's emergence and the changes it has brought to place and landscape Such a museum need not deny the nostalgic appeal of roadsides past but if done properly it could also tell us much about what the authors describe as the most important kind of place yet devised in the American experience John A. Jakle is Emeritus Professor of Geography at the University of Illinois Urbana Champaign Keith A. Sculle is the former head of research and education at the Illinois Historic Preservation Agency They have coauthored such books as *America's Main Street Hotels* *Transiency* and

Community in the Early Automobile Age Motoring The Highway Experience in America Fast Food Roadside Restaurants in the Automobile Age and The Gas Station in America **Dream Cities** Wade Graham,2016-05-15 The ideas that became the blueprints for the world we live in **On The Origins of Self-Service** Franck Cochoy,2015-07-24 Most marketing scholars implicitly consider independent merchants as conservative and passive actors and study the modernization of retailing via department stores chains and supermarkets In this innovative study Franck Cochoy challenges this perspective and takes a close look at the transformation of commerce through the lens of Progressive Grocer an American trade magazine launched in 1922 Aimed at modernizing small independent grocery stores Progressive Grocer sowed the seeds for modern self service which spread in small retail outlets sometimes well before the advent of the large retail spaces which are traditionally viewed as the origin of the self service economy The author illustrates how this publication had a highly influential role on what the trade considered to be best practice and shaped what was considered to be cutting edge By displacing the consumer and their agency from the centre of analytic attention this innovative book highlights the complex impact of social technical and retailing environment factors that structure and delimit consumer freedom in the marketplace This detailed critical analysis of the origins of self service will be of interest to a wide variety of scholars not only in marketing and consumer research but also in business history sociology and cultural studies
