Klein, 1994-05-05 In this 1994 book Bradley Klein draws upon debates in international relations theory to raise important questions about the nature of strategic studies He argues that post modern critiques of realism and neorealism open up opportunities for new ways of thinking about nuclear deterrence In clear and uncluttered language he explores the links between modernity state building and strategic violence and argues that American foreign policy and NATO undertook a set of dynamic political practices intended to make and remake world order in the image of Western identity Klein warns against too facile a celebration of the end of the Cold War concluding that it is even more imperative today to appreciate the scope and power of the Western strategic project The book will be of interest to students of international relations theory strategic studies peace studies and US foreign policy **Inter-Organizational Relations and World Order** Ulrich Franke, Martin Koch, 2023-10-30 Within international relations scholarship the nature of international organizations and their relationship with each other and nation states has been widely contested This edited volume brings together a team of experts to shed new light on inter organizational relations in world politics The book covers areas from the rule of law and international security to business and sport Through its analysis it demonstrates that just as inter organizational relations themselves are diverse and complex research on this topic should also be pluralistic in order to draw new and valuable results and insights **The Concept, the Meaning and the Phenomenon New World Order** Casian Anton, 2024-11-01 In this research paper I have explored and deepened the concept meaning and phenomenon of New World Order NWO through a structured approach inspired mainly by the logical order used by Ludwig Wittgenstein but also by the ideas of Thomas Hobbes My aim is to achieve five key objectives i to present an innovative method to build a concept starting from etymological bases ii to explore the meanings attached to each individual term new world order followed by their reunification in a single concept iii to examine the process of forming a concept based on three specific terms and to analyse how they combine to create a central idea iv to explore the NWO phenomenon by exposing its stages to discover key concepts theories and other theoretical main lines of research that contribute to its development and understanding v to

review the existent literature and to extract key points and lines from existing theoretical debates and identifying real examples from world politics that reflect the concept and phenomenon of NWO By using Ludwig Wittgenstein s method I aimed to show not only the content and meaning of NWO as a concept but also the process and form of its construction The method used has the ability to offer an atomistic understanding of how complex ideas are built from their fundamental elements revealing how they intertwine to create a solid theoretical conceptual framework It is time to discover the concept meaning and phenomenon of New World Order in its truest form
