book is about the author's life motivated by two pursuits: medicine, his profession, and flyfishing, his favourite recreation. Each in their own way has provided him with challenges, enjoyment, and fulfilment. The book recounts the author's experiences as a wartime school boy, post-war medical student, army doctor in Ghana, and medical research worker at Hammersmith Hospital, London; the Massachusetts General Hospital, Boston; the Methodist Hospital, Houston; and McGill University, Montreal. It describes his drastic change in mid-career from gastroenterology to clinical lipidology and his subsequent efforts to promote the lipid hypothesis of atherosclerosis in the face of entrenched opposition from some members of the cardiological establishment. Among his achievements was the introduction of plasmapheresis to prolong the lives of severely affected patients with familial hypercholesterolaemia (FH), a hitherto fatal disorder, and he was among the first to describe the efficacy of statins in FH patients in the UK. The book also describes his leisure time activities, including running in the London and New York marathons and the hazards thereof, and his flyfishing expeditions to catch Atlantic salmon in Scotland and Russia, bonefish in the Bahamas, and brown trout in England. The narrative covers the period from the Second World War to the present day, during which there have been dramatic changes in medical practice and social attitudes. It reflects the author's experiences during the latter half of the 20th century, stretching from the early days of penicillin to the introduction of statins, and it concludes with his up-to-date appraisal of recent and exciting advances in cholesterol-lowering therapy for cardiovascular disease.

*Running Throughout Time* Roger Robinson, 2022-05-01. Every runner's story is part of a great tradition of running stories. *Running Throughout Time* tells the best and most important of them. From Atalanta, the heroic woman runner of ancient Greece, when goddesses advised on race tactics, to the new legends of Billy Mills, Joan Benoit Samuelson, and Allison Roe, the modern Atalanta, this book brings the greatest runners back to life. It is the perfect runner's bedside storybook. Colorful, dramatic, alive with human insight and period detail, these stories are also full of new discoveries. Within these pages, you will find the true story of Pheidippides and the Battle of Marathon; you will read text from the world's first newspaper report of a footrace, 1719. This book uncovers important evidence of the first road races, the origins of cross-country running, and the earliest marathons, telling the true story of the origins of the marathon and just why racers must run exactly 26 miles, 385 yards, 42.2 km. New light is thrown on more modern stories, like the first four-minute mile and the troublesome birth of the women's marathon. All runners should read this book to really know whose footsteps they run in and why running is worthy of the effort they give to it.
