Survival: One Health, One Planet, One Future

George R. Lueddeke, 2018-09-17 Planet Earth has been here for over 4.5 billion years but in just two human generations we have managed to place our only home at great risk. Many lessons from history have not yet been learned and new lessons may prove equally if not more difficult to take on board as we head deeper into the twenty-first century. This book highlights two of our greatest social problems: changing the way we relate to the planet and to one another, and confronting how we use technology for the benefit of both humankind and the planet. Covering a wide range of key topics including environmental degradation, modern life, capitalism, robotics, financing of war vs. peace, and the pressing need to reorient society towards a sustainable future, the book contends that lifelong learning for sustainability is key to our survival. The author argues that One Health, recognising the fundamental interconnections between people, animals, plants, and the environment, needs to inform the UN 2030 Sustainable Development Goals and that working towards the adoption of a new mindset is essential. We need to replace our current view of limitless resources, exploitation, competition, and conflict with one that respects the sanctity of life and strives towards well-being for all, shared prosperity, and social stability. Clearly written, evidence-based, and transdisciplinary, and including contributions from the World Bank, InterAction Council, Chatham House, UNESCO, World Economic Forum, the Tripartite One Health collaboration, UN Food and Agriculture Organization, World Organisation for Animal Health, and World Health Organization, One Health Commission, and more, this book cuts across sociopolitical, economic, and environmental lines. It will be of great interest to practitioners, academics, policy makers, students, nongovernment agencies, and the public at large in both developed and developing nations.

Two Women, Two Roads, One Future Rhonda Denise Johnson, 2019-11-12. Chloe doesn't believe in coincidences, so when strange things keep happening, she seeks the help of a Candomblé priestess to find out what's what. Oya, the Orisha of the wind, takes her through time and space from 21st-century Los Angeles to 19th-century Virginia, where she and her ancestor Ayodele, a slave on a tobacco plantation, struggle to be more than is expected of them as women and African Americans.

The Self and Self-Knowledge

Annalisa Coliva, 2012-04-19. Investigates philosophical issues to do with the self and self-knowledge. It focuses on two main problems: how to account for our thoughts and the consequences that doing so would have for our notion of the self, and how to explain our ability to know the kind of psychological states we enjoy.

Challenging the Absolute Simon F. Olia, 2014-12-30 Our contemporary world presents a seemingly inexplicable paradox It is a world where interaction among societies of different cultural traditions has never been easier A world in which modern technology has visibly overcome the physical barriers that had long condemned the majority of men to relative isolation from one another Yet our world is also one in which the illusion of a lost original cultural or religious identity grounded by a metaphysical absolute pits men against one another A physically more accessible world has thus become an increasingly fundamentalist one In this book written in the wake of such influential European thinkers as Nietzsche Heidegger Foucault Derrida and Vattimo Simon Olia analyzes the conceptual underpinnings of this paradox and argues that unless the European affirmation of man s finite existence becomes universal we shall never rid ourselves to echo Nietzsche of the repressive shadow of a long dead metaphysical idol
