Philosophical Foundations of Science Raymond J. Seeger, Robert S. Cohen, 2012-12-06 At the 1969 annual meeting of the American Association for the Advancement of Science held in Boston on December 27-29 a sequence of symposia on the philosophical foundations of science was organized jointly by Section L of the Association and the Boston Colloquium for the Philosophy of Science Section L is devoted to the history philosophy logic and sociology of science with broad connotations extended both to science and to philosophy With collaboration generously extended by other and more specialized Sections of the AAAS the Section L program took an unusually rich range of topics and indeed the

audiences were large and the discussions lively This book regrettably delayed in publication contains the major papers from those symposia of 1969 In addition it contains the distinguished George Sarton Memorial Lecture of that meeting Boltzmann Monocycles and Mechanical Explanation by Martin J Klein Some additions and omissions should be noted In Part 1 dedicated to the 450th anniversary of the birth of Leonardo da Vinci we have been unable to include a contribution by Elmer Belt who was prevented by storms from participating In Part II on physics and the explanation of life we were unable to persuade Isaac Asimov to overcome his modesty about the historical remarks he made under the title Arrhenius Revisited
