The Opossums Tale:

The Opossum's Tale Deborah L. Duvall, 2005-12-01 Have you ever seen an opossum hurrying across the road with its eyes and coat shining in your headlights Or hanging upside down from a tree Or lying on the ground playing possum as if dead And did you ever wonder why the opossum acts this way The ancient Cherokee people wondered about the opossum whose silly grin and hairless tail caught their imagination In those days the people had no written language and they relied on stories to explain the behavior of the animals in their world According to Cherokee legend the Opossum owned a magnificent tail covered in glistening fur of which he was terribly proud The tail was so magnificent in fact that the Opossum thought it his duty to make everyone else appreciate it as well In this seventh volume of the Grandmother Stories Si qua the Opossum brags constantly about his tail until his neighbors can stand it no more Something must be done about him The prideful Si qua is overcome by loss and despair when his outer beauty is suddenly gone But an unexpected ally helps Si qua discover powerful abilities within himself that will soon win the true admiration of his friends Visit the authors website at www.jacobandduvall.com

The Raw and the Cooked Claude Lévi-Strauss,1983-03-15 In anthropological terms the concept of the raw versus the cooked has long been associated with the dichotomy between the natural world and the world of human culture In a broad based empirical study of native mythologies Claude Lévi Strauss proposes a structural and thematic link between the opposition of the raw and the cooked in mythological thought and man's attempt to establish a balanced relationship between natural and cultural forces Lévi Strauss postulates that the raw/cooked axis is characteristic of all human culture with elements falling along the raw side of the axis being those of natural origin and those on the cooked side being of cultural origin i.e products of human creation Symbolically cooking marks the

transition from nature to culture by means of which the human state can be defined in accordance with all its attributes In mythological thought the cooking of food is in effect a form of mediation between nature and society between life and death and between heaven and earth The cook in turn can be viewed as a cultural agent whose function is to mediate the conjunction of the raw product and the human consumer the operation of which has the effect of making sure the natural is at once cooked and socialized

The Bear and His Sons James M. Taggart, 2010-07-05 All the world over people tell stories to express their deepest feelings about such things as what makes a real man or woman what true love courage or any other virtue is what the proper relationships are between people Often groups of people widely separated by space or time will tell the same basic story but with differences in the details that reveal much about a particular group's worldview This book looks at differences in the telling of several common Hispanic folktales James Taggart contrasts how two men a Spaniard and an Aztec speaking Mexican tell such tales as The Bear's Son He explores how their stories present different ways of being a man in their respective cultures Taggart's analysis contributes to a revision of Freud's theory of gender which was heavily grounded in biological determinism Taggart focuses instead on how fathers reproduce different forms of masculinity in their sons In particular he shows how fathers who care for their infant sons teach them a relational masculinity based on a connected view of human relationships Thus *The Bear and His Sons* will be important reading not only in anthropology and folklore but also in the growing field of men's studies *The Baptist*, 1920 **Library of Congress Subject Headings** Library of Congress, 2012 *Library of Congress Subject Headings* Library of Congress.
