The Emergence of Civilization Charles Keith Maisels, 2003-12-16 The Emergence of Civilisation is a major contribution to our understanding of the development of urban culture and social stratification in the Near Eastern region Charles Maisels argues that our present assumptions about state formation based on nineteenth century speculations are wrong His investigation illuminates the changes in scale complexity and hierarchy which accompany the development of civilisation The book draws conclusions about the dynamics of social change and the processes of social evolution in general applying those concepts to the rise of Greece and Rome and to the collapse of the classical Mediterranean world **The Origins of**

Varia Mesopotamica Jens Høyrup,2025-05-16 The central theme of the 21 essays collected here and written between 1989 and 2019 is Ancient Mesopotamian Mathematics its techniques and concepts but also its historical dynamics and its influence on later Greek and Arabic and thus to later European mathematical reasoning In addition the first essay deals with historical dynamics in the field of language and argues that the Sumerian as a language originated from a creole language of the slaves of the late fourth millennium and only thereafter developed into the elaborate Sumerian language attested in the late 3rd Millennium BCE

Early Mesopotamia Nicholas Postgate,2017-07-05 The roots of our modern world lie in the civilization of Mesopotamia which saw the development of the first urban society and the invention of writing The cuneiform texts reveal the technological and social innovations of Sumer and Babylonia as surprisingly modern and the influence of this fascinating culture was felt throughout the Near East Early Mesopotamia gives an entirely new account integrating the archaeology with historical data which until now have been largely scattered in specialist literature

A Bibliography on Writing and Written Language Konrad Ehlich,Florian Coulmas,Gabriele Graefen,2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years No comprehensive bibliography on this subject has been published since Sattler s 1935 handbook With a selection of some 27 500 titles it covers the most important literature in all scientific fields relating to writing Emphasis has been placed on the interdisciplinary organization of the bibliography creating many points of common interest for literacy experts educationalists psychologists sociologists linguists cultural anthropologists and historians The bibliography is organized in such a way as to provide the specialist as well as the

researcher in neighboring disciplines with access to the relevant literature on writing in a given field While necessarily selective it also offers information on more specialized bibliographies In addition an overview of norms and standards concerning script and writing will prove very useful for non professional readers It is therefore also of interest to the generally interested public as a reference work for the humanities **In Measure, Number, and Weight** Jens
