driven novel Indie Picks Magazine *Handbook of Adult Development and Learning* Carol Hoare, 2006-03-30 Adult development and learning have always existed as two separate fields of study with development falling under psychology and learning under education. Recent advances in theory, research, and practice, however, have made it clear that an important reciprocal relationship exists between them: advances in development frequently lead to learning, and conversely, learning quite often fuels development. The synchronicity between development and learning is responsible for positive changes in many capacities, including insight, intelligence, reflective and meta-cognition, personality expression, interpersonal competence, and self-efficacy. This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning. The *Handbook of Adult Development and Learning* is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline: the latest research at the intersection of these fields. It examines six major aspects of their intersection: foundations, key areas of integration, the self-system, higher reaches of development and learning, essential contexts, and specific applications. An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline. Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research. This handbook is a must-read for all who promote optimal aging. It will be an invaluable reference for scholars in development and education, as well as a rich resource for policy makers and practitioners such as corporate executives and human resource personnel. **Haunted Medina**

County, Ohio Brandon Massullo, 2022-08-22 The dreadful howls of coyotes are common in the shadows surrounding Medina County, but perhaps something else, something entirely more fearsome, lurks in the night. In 1906, the specter now known as the Woman in Black so terrified residents in Medina Square that a curfew was imposed. Restless spirits rattling chains and nefarious deeds are rumored to have occurred in a farmhouse in Sharon Township. Legend has it that about 100 years ago, a witch preyed on the residents of Liverpool Township, and the ghost of a teenage boy is said to haunt the men's restroom at Plum Creek Park in Brunswick Hills. Join parapsychologist Brandon Massullo as he sheds light on the ghostly lore surrounding Medina County's restaurants, libraries, freeways, parks, and more. This book develops a synthesizing social science approach to better understand societal development in the wake of the increasingly significant digital technology. The underlying idea is that norms as expectations today are not primarily related to social expectations emanating from human interactions but come from systems that mankind has created for fulfilling its needs. Today the economy via the market and technology via digitization generate stronger and more frequent expectations than the social system. By expanding the sociological understanding of norms, the book makes comparisons between different parts of society possible and creates a more holistic understanding of contemporary society. The book will be of interest to academics and researchers in the areas of sociology of law, legal theory, philosophy of law, sociology, and social psychology.
