[Elder Care in Crisis](#) Emily K. Abel, 2022-10-25 Explains why there is a crisis in caring for elderly people and how the COVID 19 pandemic exacerbated it Because government policies are based on an ethic of family responsibility repeated calls to support family members caring for the burgeoning elderly population have gone unanswered Without publicly funded long term care services many family caregivers cannot find relief from obligations that threaten to overwhelm them The

crisis also stems from the plight of direct care workers nursing home assistants and home health aides most of whom are women from racially marginalized groups who receive little respect remuneration or job security Drawing on an online support group for people caring for spouses and partners with dementia Elder Care in Crisis examines the availability and quality of respite care which provides temporary relief from the burdens of care the long tortuous process through which family members decide whether to move spouses and partners to institutions and the likelihood that caregivers will engage in political action to demand greater public support When the pandemic began caregivers watched in horror as nursing homes turned into deathtraps and then locked their doors to visitors Terrified by the possibility of loved ones in nursing homes contracting the disease or suffering from loneliness some caregivers brought them home Others endured the pain of leaving relatives with severe cognitive impairments at the hospital door and the difficulties of sheltering in place with people with dementia who could not understand safety regulations or describe their symptoms Direct care workers were compelled to accept unsafe conditions or leave the labor force At the same time however the disaster provided an impetus for change and helped activists and scholars develop a vision of a future in which care is central to social life Elder Care in Crisis exposes the harrowing state of growing old in America offering concrete solutions and illustrating why they are necessary **The**

Moss,2010-04-15 While white residents of

antebellum Boston and New Haven forcefully opposed the education of black residents their counterparts in slaveholding Baltimore did little to resist the establishment of African American schools Such discrepancies Hilary Moss argues suggest that white opposition to black education was not a foregone conclusion Through the comparative lenses of these three cities she shows why opposition erupted where it did across the United States during the same period that gave rise to public

education As common schooling emerged in the 1830s providing white children of all classes and ethnicities with the opportunity to become full fledged citizens it redefined citizenship as synonymous with whiteness This link between school and American identity Moss argues increased white hostility to black education at the same time that it spurred African Americans to demand public schooling as a means of securing status as full and equal members of society Shedding new light on the efforts of black Americans to learn independently in the face of white attempts to withhold opportunity Schooling Citizens narrates a previously untold chapter in the thorny history of America s educational inequality

The World and All the Things upon It David A. Chang, 2016-06-01 Winner of the Modern Language Association s Prize for Studies in Native American Literatures Cultures and Languages Winner of the American Historical Association s Albert J Beveridge Award Winner of NAISA s Best Subsequent Book Award Winner of the Western History Association s John C Ewers Award Finalist for the John Hope Franklin Prize What if we saw indigenous people as the active agents of global exploration rather than as the passive objects of that exploration What if instead of conceiving of global exploration as an enterprise just of European men such as Columbus or Cook or Magellan we thought of it as an enterprise of the people they discovered What could such a new perspective reveal about geographical understanding and its place in struggles over power in the context of colonialism The World and All the Things upon It addresses these questions by tracing how Kanaka Maoli Native Hawaiian people explored the outside world and generated their own understandings of it in the century after James Cook s arrival in 1778 Writing with verve David A Chang draws on the compelling words of long ignored Hawaiian language sources stories songs chants and political prose to demonstrate how Native Hawaiian people worked to influence their metaphorical place in the world We meet for example Ka iana a Hawaiian chief who took an English captain as his lover and while sailing throughout the Pacific considered how Chinese Filipinos Pacific Islanders and Native Americans might shape relations with Westerners to their own advantage Chang s book is unique in examining travel sexuality spirituality print culture gender labor education and race to shed light on how constructions of global geography became a site through which Hawaiians as well as their would be colonizers perceived and contested imperialism colonialism and nationalism Rarely have historians

asked how non Western people imagined and even forged their own geographies of their colonizers and the broader world This book takes up that task It emphasizes moreover that there is no better way to understand the process and meaning of global exploration than by looking out from the shores of a place such as Hawai i that was allegedly the object and not the agent of exploration

Whaling Captains of Color Skip Finley, 2022-02-15 The history of whaling as an industry on this continent has been well told in books including some that have been bestsellers but what hasn t been told is the story of whaling s leaders of color in an era when the only other option was slavery Whaling was one of the first American industries to exhibit diversity A man became a captain not because he was white or well connected but because he knew how to kill a whale Along the way he could learn navigation and reading and writing Whaling presented a tantalizing alternative to mainland life Working with archival records at whaling museums in libraries from private archives and interviews with people whose ancestors were whaling masters Finley culls stories from the lives of over 50 black whaling captains to create a portrait of what life was like for these leaders of color on the high seas Each time a ship spotted a whale a group often including the captain would jump into a small boat row to the whale and attack it at times with the captain delivering the killing blow The first second or third mate and boat steerer could eventually have opportunities to move into increasingly responsible roles Finley explains how this skills based system propelled captains of color to the helm The book concludes as facts and factions conspire to kill the industry including wars weather bad management poor judgment disease obsolescence and a non renewable natural resource Ironically the end of the Civil War allowed the African Americans who were captains to exit the difficult and dangerous occupation and make room for the Cape Verdean who picked up the mantle literally to the end of the industry

American Founders Christina Proenza-Coles, 2019-03-01 2019 Foreword INDIES Finalist American Founders reveals men and women of African descent as key protagonists in the story of American democracy It chronicles how black people developed and defended New World settlements undermined slavery and championed freedom throughout the hemisphere from the sixteenth through the twentieth centuries While conventional history tends to reduce the roles of African Americans to antebellum slavery and the civil rights movement in reality African residents preceded the English by a century and arrived in the Americas in numbers that far exceeded European migrants up until 1820 Afro Americans were omnipresent in the founding and advancement of the Americas and recurrently outnumbered Europeans at many times and places from colonial Peru to antebellum Virginia African descended people contributed to every facet of American history as explorers conquistadores settlers soldiers sailors servants slaves rebels leaders lawyers litigants laborers artisans artists activists translators teachers doctors nurses inventors investors merchants mathematicians scientists scholars engineers entrepreneurs generals cowboys pirates professors politicians priests poets and presidents The multitude of events and mixed race individuals included in the book underscores that black and white Americans share the same history and in many cases the same ancestry American Founders is meant to celebrate this shared heritage and strengthen these bonds

Fight for Interracial Marriage Rights in Antebellum Massachusetts Amber D. Moulton, 2015-04-06 Though Massachusetts banned slavery in 1780 prior to the Civil War a law prohibiting marriage between whites and blacks reinforced the state's racial caste system Amber Moulton recreates an unlikely collaboration of reformers who sought to rectify what they saw as an indefensible injustice leading to the legalization of interracial marriage **Leviathan: The History of Whaling in**
