The Dream Years:

Dream Year Ben Arment, 2015-09-08 About two thirds of Americans hate their jobs and feel like they re not making a difference in the world They re frustrated by unrealized dreams that seem hopelessly out of reach Serial entrepreneur Ben Arment has developed a one year process called Dream Year which helps people make radical changes in their careers and lives His book outlines practical steps to identify finance and execute dream projects and sustain them for years to come Arment features true stories from many of the hundreds of successful participants in his Dream Year sessions who have reinvented their lives to enjoy greater enthusiasm and fulfillment while still making a living He proves that no goal is too farfetched whether it s starting an ice cream parlor writing a book or launching a nonprofit *The Years of The Switch and The Dream of The Singularity* Joe Gano-Mego, The main theory in this book is the fact that humans as a species have stopped evolving in vivo They are evolving in caput It means that humans by developping technology turn themselves into a never ending list of sub species The dynamics of in caput evolution are modelled in Julia and described in detail in this book All equations are described and Julia code listings are present in this book The conclusions coming from those equations are the following We have seen that in caput evolution can define the way by which the homo sapiens species operates Defining with allometric equations the in caput evolution is possible In that case the most plausible equation models succeed in defining the current humanity s curve with a time extension from 2000 CE to 6000 CE All of a sudden the current s curve became visible It is the technology that fuels this in caput evolution s curve The technology level allows us to predict the human population during the s curve and the human lifespan Interestingly the quarter power law so crucial in allometry stay the course also in this case If we believe in those equations then the corresponding s curves of the human population and technology level went through their maximum growth points during the last few decades Therefore we have switched from growing growth to decreasing growth Those were the years of the switch for this s curve that can be defined as the technarian age jump It is possible to plot factor population function of the technology level factor which shows the functional response of humanity during the technarian age jump It usually is not easy to diverge a lot from a functional response But there are two sides to the functional response One is the crowded side Where there is more population and fewer resources the other side is the smart side They both go to the same point but one side is the smarter and safer side In front of factor population and factor technology level it is possible to extend the definition of species fitness beyond simply the factor population but also the factor technology level into it Life is a succession of s curves reversely falling into negentropy Before the technarian age jump s curve humanity went through the venatorian s curve and the agrarian s curve Simplified models of venatorian agrarian and technarian societies have been done to evaluate if dynamic societal movements could impact the main s curve But societal movements likely have only a limited impact on the overall humanity functional response However there has been an exciting result modelling the agrarian society It appears that its well documented plural centenarian

instability cycle might actually be generated by elite over reproduction but also end especially by the elite loss of efficiency The discovered allometry equations enable us to estimate that humans are right now the equivalent of a 98% material aggregation and 2% molecular aggregation At the end of the technarian s curve they will be 99 5% material and 0 5% molecular That is if nothing changes But things will change The new s curve is getting started It will be the one of The Singularity It is unknown when and how it will play out It is unknown if in the middle there will be a long or very long asymptotic phase but it will be a crucially important and exciting time Hopefully humanity will fulfil its destiny of being a Proteromonoc species

The Girl in the Dream: A Love Story planned 500 years ag Pravin Agarwal,2020-03-01 2017 Los Angeles Vivaan a NASA scientist has a strange recurring dream of a mysterious girl His engagement with Riya turns into a nightmare when his dream starts turning into reality He flies to Madhya Pradesh to find himself at the center of a 500 years old enigma 1500 AD Kingdom of Ujjain Shrinika is heartbroken when she is betrayed by Rudra the king of Ujjain After the unfortunate incident she mysteriously disappeared 2017 Madhya Pradesh Dhiren the evil son of the village sarpanch is in desperate search of the ancient Statue of Lord Shiva which is hidden somewhere in Shivgarh Fort and worth a billion dollars 2011 MNIT Jaipur Rachit fall head over heels in love with Swara when he is asked to propose to her as a ragging prank by his seniors What links Rachit and Swara to the complex puzzle of Vivaan s dream What is the secret of the ancient Shiva temple What connects Vivaan to Shrinika the missing girl in the 16th century Read on as you travel through a saga of love and passion betrayal and conspiracy hope and ambition

Yugantar: The Dream of Bharatavarsha Takes Shape 2300 Years Ago Raghavan Srinivasan,2020-11-25 The fourth century BCE is full of dangers and opportunities Old republics are giving way to empires and cities Naastik sects are challenging the established varna system The intellectual life of India is bristling like new shoots after the monsoon The domination of the Kshatriyas and the Brahmanas is being challenged State power is up for grabs And the Macedonians are at the gates Most people believe that Bharatavarsha is only a dream But not the Yugantar a brotherhood of the wisest and most selfless thinkers of ancient India Interesting turn of events bring ordinary people from different parts of the subcontinent into the fold of the Yugantar a rebel blacksmith from Ujjayini a Siddha doctor from Madurai a doughty mariner from Muziris a trader from Pataliputra and a widow nun from Kaushambi They represent a microcosm of the sub continent Each of them is drawn towards the Yugantar by a strange turn of events Each has a prowess which the Yugantar can mould into a formidable force They converge in Takshashila the centre of learning and transformation This is the story of how their wit and determination contribute to a united Bharatavarsha
